COMPARATIVE GOVT. & POLITICS

31/03/2017

Q. What is comparative Govt. & Politics or what is comparative Method. Discuss the evolution of the discipline & what are the limitations of traditional comparative politics.

- What is comparative politics ?

comparative politics is as old as political science philosophy. Aristotle is known as Father of comparative politics. Aristotle was influenced by his father who was a physician. Aristotle has applied the method of classification found in Biology, w.r.t the study of constitution. Aristotle has studied 158 constitutions & have classified them on the basis of number & purpose. Aristotle's theory of constitutions is one of the earliest work in comparative method.

In comparative politics scholars make comparison b/w Domestic political system.

Evolution of comparative politics ?

It evolved in two phases:

① Uptill 2nd World War (Traditional comparative politics)

② Since the end of 2nd World War (Modern comparative politics).

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

- Features of Traditional comparative politics:

As a discipline

before ← II WW → after

Scope- const^{n} of west countries → New states emerged

Method- traditional → Modern-Behavioural

The traditional comparative politics concentrated its focus on the study of western countries. Because non-western world was colony of western countries. They lacked independent political system.

Traditional comparative politics was studied in traditional manner the major approach applied was 'legal institutional approach.'

- Features of Modern Comparative Politics:

Focus shifted from the study of western countries to the study of non-western countries or developing areas. Not only the scope of subject changed even methodology changed under the influence of Behaviouralism. Maximum utilisation of Behavioural method has been in the discipline of comparative politics.

→ Limitations

↓

Narrow

↓

Ethnocentrism

↓

legal-institutional

↓

static - only const^{n}

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

ethnocentrism → feeling of superiority
Eg. Euro-centric → Europe.

Limitations of Traditional Comparative Politics.

(i) Parochial in nature (Narrow in scope).
Why?
Focused on western countries.

(ii) Ethnocentric :
Western scholars did not recognise the existence of non-western political institutions. They believe that people outside Europe were Barbaric & Imperialism was a civilising mission.

(iii) Static in Nature :
Since, Method adopted was the study of constitutions, it remained static or textual. They have not tried to understand the social & cultural factors shaping the political system. They focused on the study of institutions & neglected the study of political processes.

(iv) Traditional Comparative Politics is actually the study of Comparative Govt. rather than Comparative Politics.

(v) Traditional Comparative Politics was essentially 'Non-comparative'. It was non-comparative because western world is a one world. There is not much difference in their culture, level of political development, economic development. Hence, we do not get much contrasting features.

S. America - TWC - Global south

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

(vi) Traditional methods were more discriptive & less analytical.

- Modern Comparative Politics.

Modern comparative politics started after 2nd world war. As many countries of non-western world got independence & they established their own political systems.

As new number / large no. of countries came into existence. It was realised that traditional method will not work. We have to go beyond the study of constitution.

Why?

In western countries we do not found the gap b/w theory & practice but in non-western world there is a big gap b/w theory & practice. In most of the countries constitution exist but constitutionalism does not exist. Hence, it become essential to understand extra constitutional factors like Nature of society, culture, stage of Economic Developement, level of modernisation.

Thus, Modern methods like systems Approach, structural functional Approach, political culture, political sociology, political economy have come into existence.

Today comparative politics is a vibrant discipline. And large no. of researchs are going on.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Modern Methods :

(1) Systems Approach -

Q. Discuss the salient features of systems Approach. Do you think systems Approach is status Quoist.

→ Introduction -

Type of Approach -

Behavioural Approach. (Scientific Approach).

David Easton ↓ Behaviouralism

Systems Approach in Political Science was given by David Easton.

Systems Approach is influenced by General system Theory General systems Theory is based on Biology. It is not enough to study the organ. It is important to understand the environment in which organ is placed. It is not enough its features, it is necessary to understand the processes.

Systems Approach is a result of movement in political science which called for the adoption of inter-disciplinary approach. Systems Approach was first use by Talcott Parsons in sociology. Inspired by parsons about the possibility of the use of systems approach in social sciences. David Easton has developed the concept of political system.

Features of Systems Approach -

Systems Approach is based on the concept of system

What is system?

System = set of elements in the state of interaction

Interaction - pattern or specific.

Eg. Circulatory system.

Veins will not do work of Heart

Systems Approach - may be asked in paper one (1) with same answer.

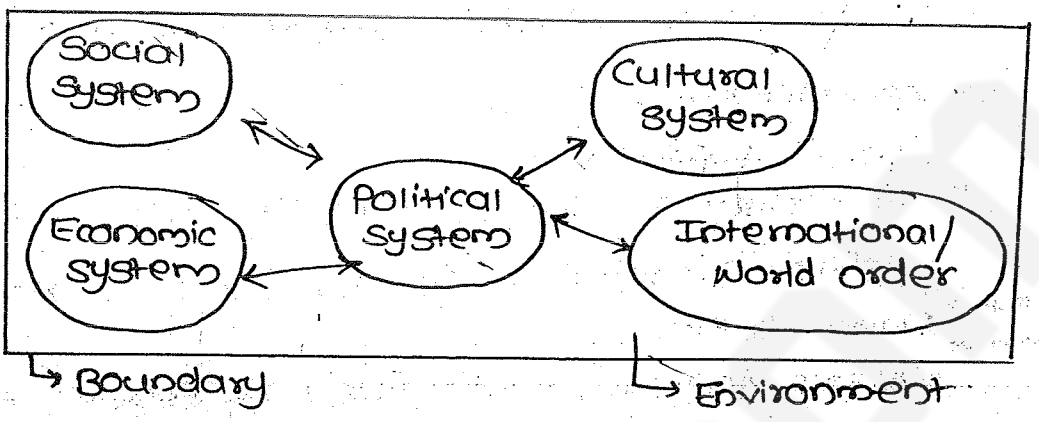

→ Systems Approach - Behavioural - Model risks.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

System is a set of elements in the state of interaction. Interaction has to be patterned/ structured.

- Diagram of Political System.

System has environment & a boundary. Boundary defines the limit of system beyond which the factors do not impact or get impacted. Environment contains those factors or ~~syst~~ sub systems which are influenced by system & which gets influenced by system.

- Definition of Political System-

It is seperated from other systems on the basis of unique function it performs.

What unique function it perform?

Authoritative Allocation of values. It means political system is a main decision making body having authority & thus its decisions are legally binding.

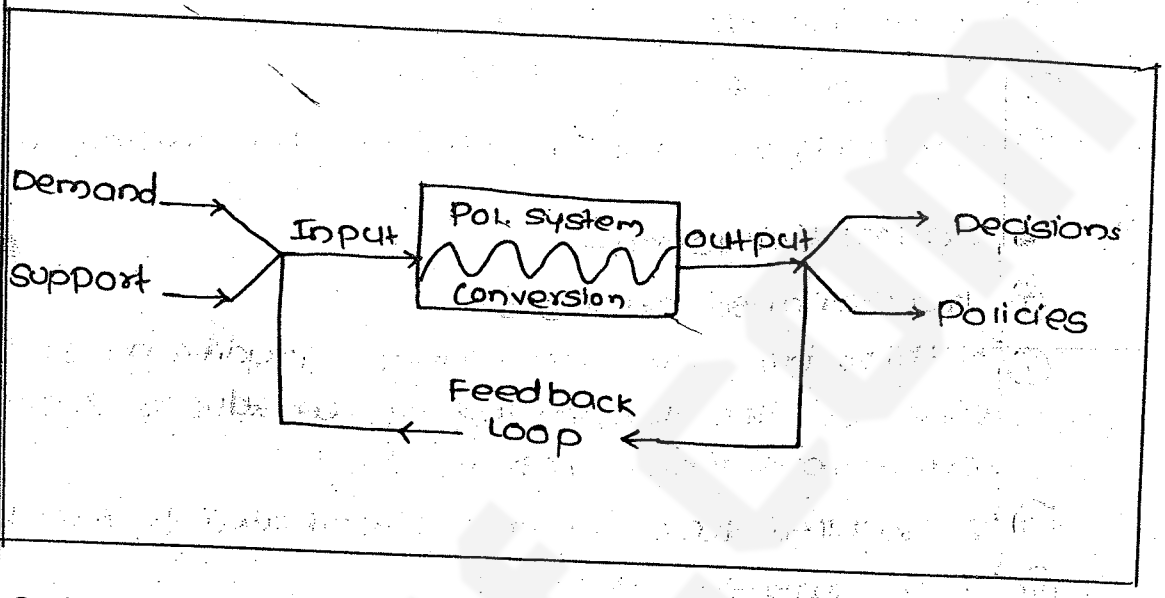

Diagram is not fixed- there are more factors
Diagram- human body can be taken as any example where
various systems exists such as circulatory system,
Respiration system, endocrine system etc

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

How political system function?

According to David Easton, Political system is like a machine. Like other machines political system also work on input output mechanism.

Political system functions on input output mechanism. Demand comes from the Environment, demand can be for making a particular policy. David Easton has give 4 types of demand:

(i) Demand for allocation of Goods & services:
(ii) Demand for regulation of Behaviour.
(iii) Demand for Participation.
(iv) Demand for communication & Participation.

Support is of 4 types:

(i) Material support.
(ii) obidience to the law
(iii) support by Participation.
(iv) support by paying attention to Govt. communication.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

→ Output -
Either single decision or set of decisions. David Easton gives 4 types of output.

(i) Extraction - Eg. Payment of Taxes., fees etc.
(ii) Regulation of Behaviour.
(iii) Allocation of Goods & Services.
(iv) Symbolic Eg. Respect National Flag, Anthem etc.

● Critical Evaluation -

(I) Traditionalists Criticism -
(i) Nothing but cosmetic change - Traditionalists have explained the functioning of the state in a similar way even without such model.
(ii) Introduced unnecessary complicated terminology.
(iii) Lack analytical depth.
(iv) It is just a conceptual framework.
(v) It can be relevant only at the only initial level of research for organisation of data.

(II) Criticism by Marxists -
(i) Marxist consider systems Approach is biased towards the western liberal Democratic system. Hence, it is not a value free approach. Despite the fact it claims to be scientific.
(ii) It present western political system as an ideal type. Hence, it expect other systems to move in the direction of western systems or otherwise it may give the impression that other systems are imperfect.
(iii) Model is status quoist because it show as if system is running in a smooth manner. It shows as if feed-back loop communicate people's aspiration & political system responds accordingly.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

There is no scope to explain the phenomena of social protest, social movement & revolution.

Conclusion :

Though systems Approach suffer from certain limitation yet we need to acknowledge the urge to make study of politics scientific. systems Approach show the necessity to go beyond the study of constitutions & to understand environmental factors shaping political systems.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Structural Functional Approach ::

Scholar – Gabrial Almond & Powell.

Purpose -

(i) To develope a model which can be utilised for the study of developing areas.

(ii) To address the defects of Easton's Model.

Which defects?

(i) Easton's Model is too general.

(ii) Easton's Model does not give detailed view of various structures & functions within the political system.

Source of Influence -

(i) David Easton :

Easton's Model provide the basic framework.

(ii) The concept of political developement given by Lucian Pye.

(iii) Functionalism associated with Anthropologists like Malinowski

According to Anthropologists like Malinowski, every society has some key functions for its survival though the structure performing these functions may vary.

(iv) They have also taken influence from legal institutional approach.

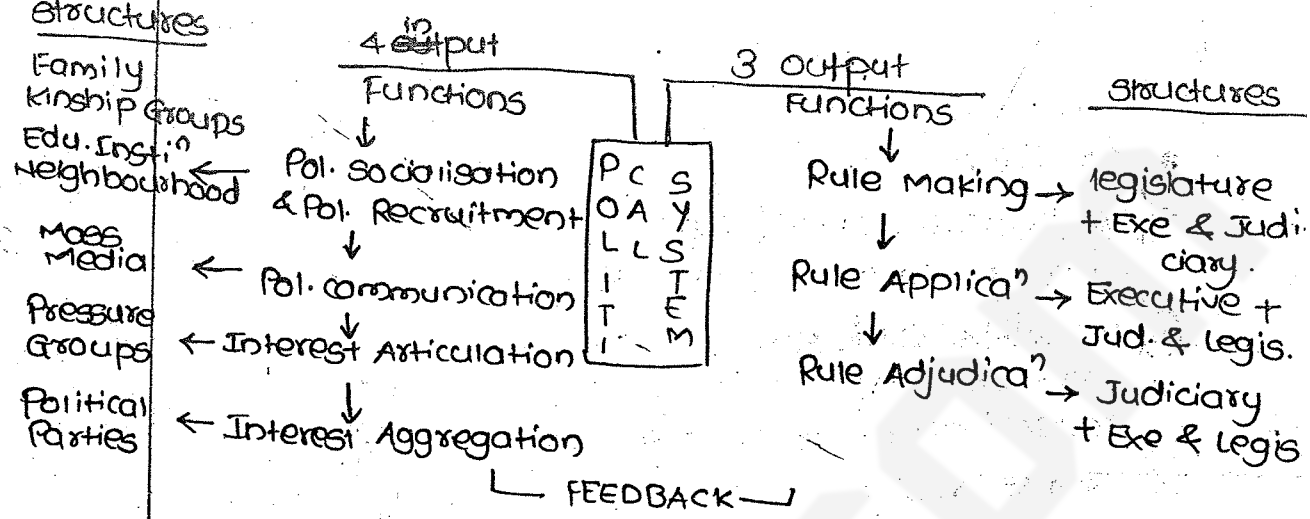

According to Almond & Powell structural functional approach is a good approach for Comparative Politics because it takes into account the fact that different political systems are at different stage of political developement.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Lecture 2
01/04/2017

- Structural Functional Approach -

- Features - Explain 4 input & 3 output functions.
- Explain corresponding structure

What is the advantage over system's Approach?

(i) Gives a detailed view of the structures & functions within the political system.

(ii) It is a better tool for comparison.

How?

Though not visible in diagram yet in theory they assume that different political systems are at different stage of development. Eg. Nature of Pressure Groups & political parties will differ in developed & developing societies. In developed societies more associational Pressure Groups in developing societies more community based Pressure Groups. ~~in Professional soci~~ will be present In developed countries more professional political parties, in developing countries political parties based on caste & community will be more in number

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Similarly in traditional society primitive methods of mass communication will be applied where as in developed society more technology based communication is applied. Thus this model is applicable for both advanced & developing countries.

- Criticism

(i) Traditionalists Criticism.
Same as criticism of system Approach.

(ii) Marxists Criticism -
→ same as criticism of systems Approach.
(i) Modeled on western countries, so biased.
(ii) Status Quoist
The model does not have any scope for explaining crisis, protest etc.

→ Contribution -
Provides a conceptual framework for collection & organisation of data. GI
Give detailed view of different structures & functions.
More dynamic than systems approach because it accept that different political systems are at different stage of development.

upscpdf.com

Join Telegram for More Update : - https://t.me/upsc_pdf

Political sociology Approach -

- What is political sociology?
- Who has used Political Sociology Approach?
- Political Sociologists study which issue?
- Methods employed by Political Sociologists?
- Advantages & Disadvantages

What is Political Sociology?

Political Sociology was once an approach to study but today it exists as a Hybrid discipline considering the developement in Methods & the amount of research.

History of Political sociology -

Aristotle is known as Father of Political sociology.
Aristotle's Theory of Revolution.
In Modern times Political sociology got devided into two major streams:

(i) Marxists
(ii) Weberian

(i) Marxists

Karl Marx is considered as Modern Father of modern Political sociology. He suggested that politics can be understood only when we understand the basic structure of society & relations b/w classes.
Within Marxism there are two schools:

(a) Instrumentalists school -
(b) Structural school. -

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Instrumentalists school suggest that state is an instrument of dominant class.

Structuralists school suggest that in some situations state gains relative autonomy.

Gramsci has highlighted the role of civil society through his concept of integral state.

Marxists scholars analyse class structure of the society, nature of state, revolution, protest etc.

(ii) Weberian

Max Weber was critic of Karl Marx & supporter of capitalism. He has challeged following assumptions of Karl Marx.

(a) Economic structure is a determinant of all that happens in superstructure. He calls Marxism as mono causal explanation. In his book 'Protestant Ethics & Rise of Capitalism' he has shown how protestant ethics led to the rise of capitalism.

(b) He does not support Marx view that as capitalism will advance society will get polarised into 2 classes. On the other hand he held that there will be proliferation of classes (growth of middle classes).

(c) Max Weber was admirer of capitalism & considered it as most rational.

Thus a new school of political sociology starts with Max weber. contribution of Max weber include the the Method of Ideal Types, The concept of Authority, theory of Bureaucracy, The concept of Political Parties.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Among the prominent sociologist using weberian approach we can give the reference of Andre Beteille, Christophe Jeffrelot the studying Indian politics.

Thus political sociologists focus on following areas of research:

(9) caste, class, ethnicity, authority, revolution, Political Parties, Pressure Groups, Bureaucracy

There has been growth in political sociology after 2nd World War. After 2nd WW scholars have use behavioural approaches like field survey, quantitative data for promotion of scientific research.

Political sociology appeared to be the most relevant approach in context of study of developing areas

thus, rich literature has come into existence on the politics of developing areas.

Present status of

Initially there was lot of enthusiasm among political sociologi scientists w.r.t. the use of political sociology. However later on enthusiasm was lost.

Why?

Political scholars felt the danger to the identity of the discipline of Political science.

How?

looking for sociological reasons behind political phenomena would have made a Political science a sub-discipline of sociology.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Hence, scholars like Theda Skocpol suggested 'to bring the state back in'. She emphasised that we have to recognise the centrality of the state. Hence, there is a loss of enthusiasm by political scientists. However, sociologists have carried forward with the approach. Now, Political Sociology is considered as a sub-discipline in sociology.

upscpdf.com

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Political Economy Approach.

- What is Political Economy?

In Political Economy scholars study 'Economic Policies of the state'.

- Origin & Evolution of the discipline -

Adam Smith is considered as the Father of modern Political Economy. His book 'the Wealth of Nations' is considered as the first textbook of Political Economy. Adam Smith defined political Economy as a science of a statesman willing to bring prosperity to the nation. Adam Smith was a critic of Merchantilism & sopporter of laisser faire state. Against the school of Adam Smith emerged the Marxist school of political economy. Karl Marx has offered critique of Political economy of the school of Adam Smith & suggested that Adam Smith's policies will bring only wealth to few & not wealth to the nation as a whole.

Thus there emerged two major schools of political economy:

(i) Liberal School.
(ii) Marxist School.

In Liberal school there are two schools:

(a) Classical & Neo Liberal
(b) School of welfare economics of social Liberalism

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

In Marxists we see two schools:

(a) Instrumentalist & dependency school.

(b) Structuralists school.

Political Economy Approach has been found useful in context of the study of developing countries. The Advantage of Political Economy approach is that it is a combination of scientific as well as normative approach. Political economy is a policy science. Political economists not only use quantitative data but also suggest that what should be the economic policy of the state.

- Prof. Amartya Sen has analysed the developement strategy of India & China. He has appreciated the China's investment in the areas of Human Development. He has highlighted the neglect of Human developement in India.
- Humza Alavi has applied structural marxists approach to understand the political economy of the state in Pakistan.
- Gunnar Myrdal (Non-Marxist scholar) in his book 'Asian Drama' has analysed the nature of state in India & Indonesia & has coined the term soft state for India.
- Atul Kohli (Non-Marxist scholar) has analysed the process of land reforms in India & has highlighted the poor capacity, crisis of Governability of Indian state.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Thus, political economy is a useful approach even in the perspective of understanding flaws in the developement model & making prescription.

The weakness of Political Economy Approach:

(i) It is Normative in Nature (based on school of thought).

(ii) Its scope is limited to the analysis of economic policy

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Notes

Political Developement -

It is also an approach of Comparative Politics.

In Political Developement we measure the level of political developement in countries. Political Developement should not be confused with economic developement

→ Lucian Pye has given 3 parameters of Political Developement:

(i) Equality
(ii) capacity
(iii) Differentiation.

→ Meaning of Equality.
Political equality. It means level of political participation.

→ capacity.
Capacity of state to enforce laws & to maintain discipline.

→ Differentiation.
Functional specialisation - it means for every function there is a specialised body.

- Example of India -
- Political Participation ✓
- capacity of state - poor - soft state.
- Differentiation ✓

Samuel P. Huntington gave the concept of Political Decay. Political Decay is a situation when there is a mismatch in the level of participation & level of institutionalisation. As participation increases political

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

institutions should be adaptable coherent.

Most of the countries in third world are in the state of political decay including India. There is a growth of political consciousness, participation but at the same time there has been lack of adaptability in the political systems. From the 1970s onwards we see de-institutionalisation.

- Criticism of Political Development Approach -

It is biased towards western democracies considering them as an ideal type.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

- Political Modernisation Approach-

Exponents- Samuel P. Huntington, David Apter

Why Political Modernisation App

Political Developement Approach was considered as biased. Hence. it was suggested that rather than comparing political systems its better to compare scale of modernisation - country can choose any model of political system but what is important is modernisation.

Parameter of Modernisation.

Industrialisation, Urbanisation, Secularisation, Rationalisation

It was also believed that once modernisation takes place. Democracy will automatically come into existence.

Political Modernisation has following consequences.

(i) It results into mobilisation of people, growth of consciousness.

(ii) It ultimately results into nation building.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

- Political Culture Approach -

Scholar - Gabriel Almond, Sydney Verba.

Book - Civic Culture

- What is Political Culture ?
- What is culture ?

People's values, norms, orientation is culture

Since culture is a long term trend coe can use it as a variable for comparison.

Political culture is a sub set of culture. Political culture denotes people's values, norms, orientation w.r.t. the political system.

Almond & Verba have used Easton's Input output Mode & Max Webers Ideal type to develope the models of political culture. They have given following models.

(i) Parochial Political Culture:

Here people are indifferent towards the political system. Eg. Political culture of Tribes living in the Andaman can be considered as Parochial towards Indian Political Culture.

(ii) Subject Political Culture.

People behave like a subject rather than citizen. They feel they are not significant as faras input is concerned but they are influenced by output or policies. Political culture of most of the Third world Democracies have been subject political culture.

(iii) Participant Political Culture.

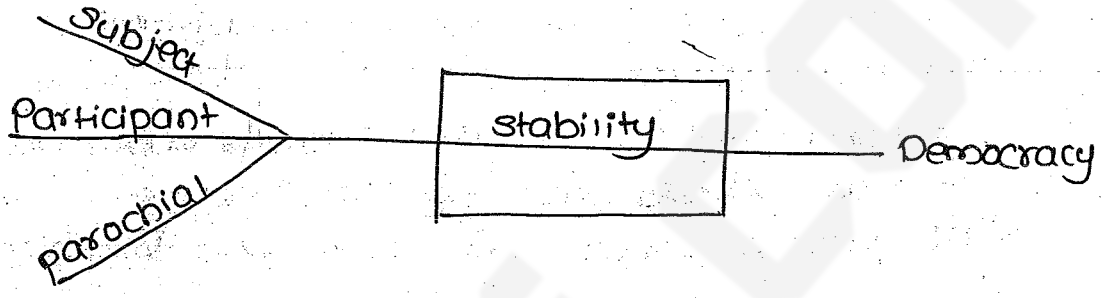

People play active role not only as a subject but also as a citizen. Political culture of western countries used to be participant political culture. At present times there is a growth of participant political culture in India.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

(iv) Civic Culture.

It is a most conducive for the stability in Democracy. very high participant culture may be a threat to Democracy. It may give rise to demogaygic leaders as happened in Germany under Hitler. Civic Culture is a combination of all the 3 cultures. Majority should have participant culture, but some section should have parochial & subject culture also.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Lecture 3
03/04/2017

- Nature of State in Advanced Industrial Societies, Developing Societies, capitalists societies, socialist societies:

- Nature of state in Advanced capitalist societies.

→ Introduction -

Political science begins & ends with the state. Though Political science begins & ends with the state yet state remains a contested concept.

Nature of state in advanced capitalist societies can be analysed from different perspectives.

(i) Liberal Perspective
(ii) Marxist Perspective

Analysis of state from Liberal perspective:

For liberals the state is neutral arbiter of conflicting interest. State is the product of will of the man. In advanced capitalist countries initially the state was minimal/police state But since 1930s onwards we see welfare state.

Analysis of state from Marxist Perspective:

Marxist challenge the neutrality of the state & suggest that state is a class institution. within marxist perspective exists two perspectives.

(i) Instrumentalists
(ii) Relative Autonomy/Structuralists.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

- According to Instrumentalist Perspective state is a executive committee of Bourgeoise class (Karl Marx)

Ralph Miliband has analysed the nature of state in post capitalist societies. According to him even welfare state remains the instrument of the capitalist class. Economic power remains concentrated & the class which controls economic power also controls political power.

Habermas has predicted that welfare state will suffer from, "legitimation crisis".

- Structuralists Approach, Relative Autonomy Approach, suggest that in certain situations state ceases to be a instrument of the dominant class.

In context of welfare state Pulantzas has adopted relative autonomy approach, According to Pulantzas because of the competitive party system state ceases to be the instrument of particular class. However in the time of crisis state will always work in favour of the rich.

- Elitists Perspective

C Wright Mill has analysed Democracy in USA & held that power lies with the 3 (classes/sections) Groups ie. the corporate groups, federal politicians & the top leaders of military.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

: Join Telegram for More Update : - https://t.me/upsc_pdf

- Pluralists perspective:

Robert Dahal called states in these societies as oliarchies which be later modified to suggest deformed polyarchies.

Thus, the nature of state remains contested.

- Nature of state in socialist state

With the exception of China, North Korea, Cuba we do not see socialist states at present. The nature of sodalist state has also been analysed from different perspectives:

(i) Marxist Leninist Perspective:

From the Marxist Leninist Perspective the states in capitalists societies are the dictatorship of the Bourgeoise class. On the other hand state in socialist state is dictatorship of proletariat. In Marxist perspective state is class institution. Socialist state is more democratic & works in the interest of majority

Analysts of socialist state by the perspective of western scholars:

Western scholar like Hannah Arendt & Karl popper called these states as totalitarian & closed societies.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

According to western scholars in these states what exists is the dictatorship of communist party & not dictatorship of proliterians.

- According to Elitist scholars Oligarchy is the iron law yet the situation is worse in socialist countries Because in socialists countries we see 'Monolithic elites'. Atleast in western countries people have choice among elites. Thus in socialist societies for all practical purposes, Authoritarianism has been existing. The collapse of Communism in eastern europe & former USSR show that people were not satisfied with these states because of their totalitarian nature.

China, Cuba, N. Korea → socialist

Nature of state in Developing countries :

The nature of state has been studied by different perspectives Eg. Riggs uses the term Prismatic societies for these countries.

Gunnar Myrdal has coined the term soft state for state in India & Indonesia.

If we apply Samuel P. Huntington's concept then majority of these states are in the state of political Decay.

Russia, Vietnam, → Democracy

From the perspective of western scholars these states are passing through the crisis of Governability. Most of the states can be called as failed states.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

From the peerspective of Marxist scholars :

(i) Dependency school

State in Africa & Latin America were considered as puppet states or clientist regime. These states have been the instruments of the Bourgeoise classes of core countries.

(ii) Structuralist school.

Humza Alavi has analysed the nature of state in Pakistan. The theory can be applied to other South Asian states including India. In these countries we find overdeveloped state as a colonial legacy. Thus states in these countries are different from their counterparts in western countries. In non-western world modern state is an important institution & there is a mismatch b/w stage of economic developement & political developement.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Politics of Representation & Participation

→ Syllabus

Political Pressure Parties
Pressure Groups
social movements in advanced industrial & developing societies.

Political Parties:

The systematic study of political Parties is known as Statistiology. Political Parties perform essential input function in a Representative
It performs the function of interest aggregation.
Political Parties have been studied by Traditional as well as Behavioural Perspective.
Admond Burke has given the definition of political parties from traditional perspective, According to him, Group of people having shared ideology, come together for pursuit of common interest.

On the other hand otto von Kircheimer gives the concept of 'catch all parties' for catch all parties ideology does not matter. their only aim is to come to power.

Theories of Political Parties -

① Lenin.

lenin has given the concept of communist party in his pamphlet 'what is to be done?' he calls communist party as Vanguard of revolution.
He compared communist party with Bourgeoise parties & trade unions.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

communist parties are secret societies as their aim is to overthrow the system. communist parties are organised on the principles of democratic centralism.

(ii) Robert Michels :

Book - Political Parties

Michels has analysed the internal functioning of the socialist parties. Michels came to the conclusion that whether it is a Democratic Party or Liberal party or socialist party all power is concentrated in the hands of elites. He came to the conclusion that the oligarchy is the iron law.

(iii) Maurice Duverger :

Book - Political Parties

→ Contributions -

(a) Relationship b/w Electoral System & Party System (Duverger's Law).

- If electoral system is simple majoritarian type party system will be two party.
- If electoral system is proportional representation party system shall be multi party. India is exception to Duverger's law.

(b) Duverger has classified political parties into two types :

- Mass Parties - Liberal parties are mass parties.
- Cadre Parties - Non-Liberal parties (ie right-est & left-est) are cadre based parties.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

the focus is on discipline, centralisation & leadership.

(c) Duverger has given 4 types of structures of different political parties.

→ Branch- Branch is a feature of liberal parties. Branch represent the local units.

→ cell - feature of communist party local units are called as cell.

→ caucus - It represent the small group representing the elites. Primarily the feature of rightiest parties

→ Militia - some political parties also have their armed wing known as Militia. Eg. Mussolini & Hitler. Their parties had armed wings.

● Party Systems:

According to Sartori, party system is not based on number of parties but number of parties having systemic relevance. Eg. There were multiple parties in India in initial decades yet Indian party system used to be known as one Party Dominant system.

– Myron Weinar & Joseph La Palombra have given classification of party system on the basis of electoral system.

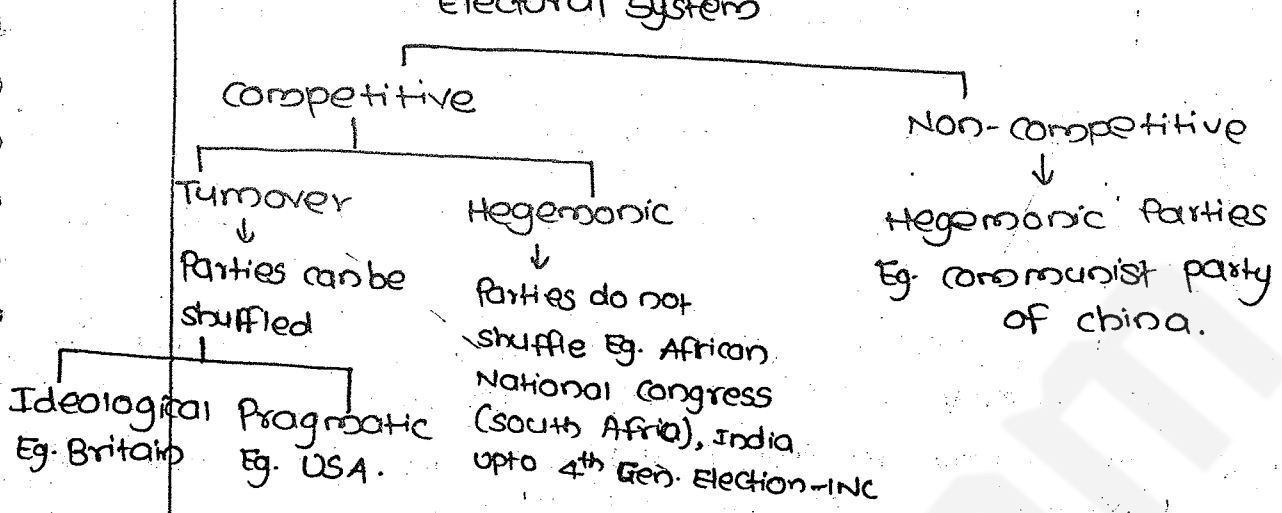

→ Electoral system:

(i) competitive

(ii) Non-competitive.- china

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

- Comparison b/w party system of Western & Non-Western. Neither western world is Homogenous, nor non-western world there are lot of internal variations. Still we can construct the ideal types of western and non-western.

In western world we see two models:

(i) Two Party system -
Eg. Britain, USA
British system is called turnover Ideological & American system is called Turnover Pragmatic.

(ii) Multi-party system.
Eg. Continental Europe, with the exception of Italy rest of the countries have stable coalition govts.

In non-western world we find various types of examples like, Hegemonic Non-competitive Party system Eg. China.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

One Party Dominant System Eg. South Africa, Multi-Party system Eg. India, Two-party system Eg. Bangladesh, Sri lanka, Iran

In Non-western world we see the growth of catch All parties.

In Non-western world there is a lack of intra party democracy. Political parties lack transparency & Accountability. Political Parties are found around personalities & Dynasties. Thus political parties reflect paradoxical features. They may be modern in their structure but traditional in their internal function.

Q. Indian Party system is passing through phase of Transition, full of contradictions & paradoxes.

→ Passing through phase of transition:
India has seen following stages:
One-party dominant system, Two party system (1977-79) Multi-party system (from 1989).
At present scholars often talk about the re-emergence of ~~de~~ epone party dominant system. BJP system replacing congress system, however it is too early to say as election of one LS is not enough to determine the trend.

→ Contradiction & Paradoxes -
As suggested by Law commission report on electoral reforms. Lack of internal democracy is a biggest contradiction. There is a growth of catch all parties. India has seen coalition govts. without healthy coalition culture. Despite democracy parties are formed on caste, religion, other ascriptive criteria. Indication is that voters are moving from identity to identity plus politics.

Western countries - less identity politics, more class politics.

Pressure Groups :

Lecture 4
04/04/2017

Pressure Groups are called invisible empires by Finer.
Pressure Groups perform the role of 'interest articulation'
Pressure Groups are found in both Democratic & Non-Democratic society but nature of Pressure Groups may vary.

Types of Pressure Groups :

① Gabriel Almond's classification.

ⓐ Institutional - Civil servants, Army Professionals
ⓑ Associational - FICCI, ABVP
ⓒ Non-Associational - Kshatriya Mahasabha
ⓓ Anomic - Jallikattu Protest

Military Bureaucratic Oligarchy → Pakistan → No Democracy

ⓐ Institutional Pressure Groups.
They are most powerful in developing countries. Because most of the states are overdeveloped states. In developed countries the role of Govt. is minimal.

ⓑ Associational Pressure Groups.
They are purely interest based like Students / Trade unions
They will be more prominent in the eastern countries.

ⓒ Non Associational Pressure Groups.
They will be more prominent in western countries

ⓓ Anomic Pressure Groups.
They will be more prominent in non-western countries.

18

Eg. Jallikattu Protest — Put in any of 3 categories.

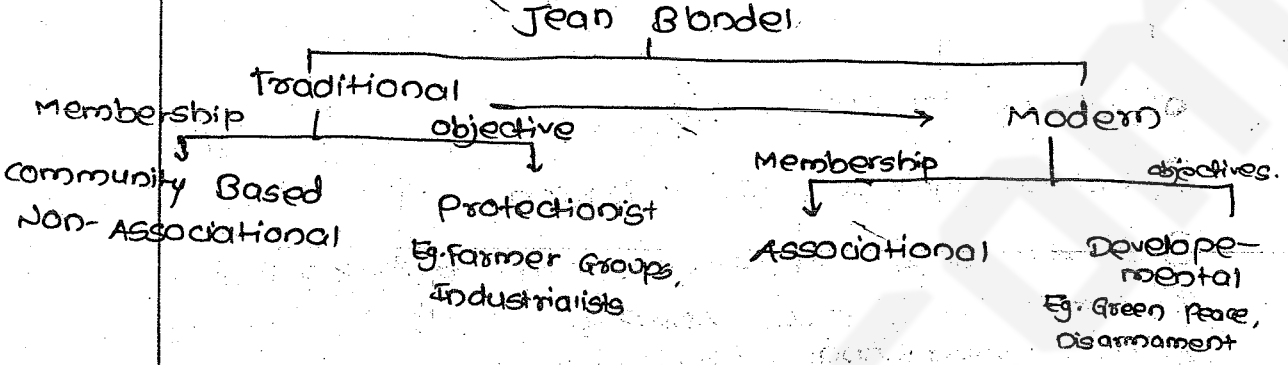

Non-Asso. - Community Based - Kshatriya Mahasabha / Gujjar mahasabha.
Anomic - Norms less - any mood behaviour - which cannot be

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

② Jean Blondel's Classification.

Almond's Model is static bas Jean Blondel has given Dynamic Model. It takes into account the changes which takes place in the society. As soci-eties from traditional to modern nature of pressu-re Group Politics also changes.

Relationships - for self advantage.
Developmental - Environmental Groups.

upscpdf.com

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

- Social Movements comparison b/w developed to Developing societies:

Political Parties, Pressure Groups & social Movements all the 3 are examples of collective behaviour. They often get interchangeable. It may happen that the social movement changes into pressure group & Pressure Group change into a party. Eg. INC started as a movement became Pressure Group & then became Political Party. It may also happen that Party is dissolved & became (Pressure Group (social movement). social Movements are least institutionalise of all. Every social movement has an ideology, strategy, leadership, social base. social Movement politics is primarily linked to left parties. politics. Liberals prefer institutional politics rather than street politics. In liberal discourse the term 'resource mobilisation' is used rather than social movement.

- social Movements in the West:

In the western countries the 1st social movements in modern times were the movement by working classes. Since worker didn't had right to work hence the only method that was available for protection of their interest was through politics of social Movement or protest. social Movements. In western countries are categorised into 2 types:

1. old social Movements. – 19th century
2. New social Movements – 1960s onwards.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

→ Difference in old & New:

(i) In terms of objectives:
old social movements were concerned with Basic issues of life. Whereas new social movements are concerned with quality of life Eg. Protection of Environment, Animal Rights, Human Rights.

(ii) In terms of social base:
social base of old social movements was from working classes.
social base of new social movements is from middle classes.

(iii) In terms of technique or strategy:
Old social movements prefer direct action, coercive actions like strike, mass protest. Whereas new social movements goes for innovative societies like use of theatres, literary mode of expression.

(iv) In terms of Ideological orientation:
Old social movements were materialistic in orientation & whereas new social movements were post materialistic in orientation

● Difference b/w Developed & Developing

In developing world we see the co-existence of old & new. Eg. If we take environmental movement in India it has a feature of both old & new. Eg. They include both type of objectives:
(i) concerned with basic issues as well as protection of Environment.
(ii) Similarly in terms of social composition main base comes from tribals but leadership comes from middle classes

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Techniques- :Both kinds of techniques are involved protest, theatres, literary expression.

orientation- both materialist & non-materialist.

1.Q. Evaluate the nature & Distinction of Anomic & Associational Interest Groups in the pressure politics of Developing countries.

2.Q. Are pressure Groups in India are in a position to protect or promote interests of their members.

1. Pressure Groups are called invisible empires.
- PG perform the role of interest articulation.
- comparison of PG politics is one of the prominent area of investigating in modern comparative politics.
- Gabriel Almond has given following classification: Institutional, Associational, Non-Associational, Anomic.
- Associational PG are interest based PG they have greater presence in the developed countries.
- Anomic PG are crowd Behaviours & they are more prominent in developing countries because Democracy is not well institutionalise.
- According to Samel P. Huntington, Developing countries suffer from Political Decay as participation of people increases coherence & adaptability of political institutions also increase. In the situation of political decay we see more Anomic responses.
- Jean Blondel has provided an alternative model which suggest that nature of PG politics changes with the change in the society as society becomes politically

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

developed, Democracy become institutionalise. Associational PG will increase. We can also apply political modernisation theory which suggest that once urbanisation industrialisation secularisation, rationalisation takes place nation building also takes place. & role of ethnic politics decreases.

2. PG are invisible empires. Perform imp. input function.

refer Indian section PG

Role of PG in India has been analysed by scholars like Rajni Kothari, Robert Hardgrave.

[Add Indian section of 'PG].

Most powerful PG are community based. They have been successful in getting benefits for their members. Institutional PG are also very high specially the members of Civil servants/society elite. they are also part of system. so they can directly influence the policy.

PG of rich farmers have been successful in getting concessions of their interest

Since 1991 PG of corporate classes have been accomodated by the Govt. in a big way However following PG do not have good record.

(i) Trade unions - labour rights are consistently diluted. Trade unions are subordinate partners of political parties.

(ii) Student unions - They are also not very successful because like Trade unions they are subordinate partners & devided on ideological lines.

(iii) women org. - lack solidarity, devided on religion & caste

(iv) Org. of poor peasants are often not tolerated & many such org. are banned under unlawful Activities (ULAA).

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Q. Examine whether new social movements can shall be alternative strategy for establishing new links b/w Govt. & society.

Globalisation -

→ Syllabus

Responses from developed & developing societies.

What is Globalisation?

Globalisation is explained by concepts like 'Global village' given by Marshall Mc Luhan or 'Borderless world' by Kenichi ohame, World is flat by Thomas Friedman, compression in terms of time & space by Anthony Giddens.

Thomas Friedman in his book 'the lexus & the olive tree' mentions globalisation as a process by which nation state, corporations, civil societies & individuals are interacting with each other at a level which has been unprecedented. He defines Globalisation as the process by which our interaction have become farther, faster, deeper & cheaper.

Today it will be wrong to say that the Globalisation is a myth or mere buzz word. Globalisation has impacted people around the Globe. We can feel globalisation in the cheap clothes we wear, food we eat & the ideas we hold.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Responses towards Globalisation.

In both developed & developing countries we see mix responses there are sections who consider Globalisation has benefited them, on the other hand there are sections who consider G as anti-growth. Major critics of Globalisation are:

(i) Marxists –
Marxists are not against Globalisation but they are against the present model of G
From the perspective of marxist present Globalisation is nothing but the expansion of capitalism on Global scale.

(ii) The most violente response against Globalisation has come from Islamic societies. They interpret Globalisation as an attempt to spread western values. Many politicians in the non-western world empasise on Asian values. Scholars like Bhikhu Parekh recommend the cosmopolitan idea of Globalisation based on dialogue b/w civilisations. It is not that only western model of Globalisation exist there are many other models of Globalisation. Eg. Indian model of Globalisation based on the ideal of "Vasudhaiva Kutumbakam" & "Sarve Bhavantu Sukhinh". Even Islamic societies have the concept of Brotherhood.

The nature & the consequences of the present model of Globalisation has been analysed by scholars from different perspective:

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

(i) those who support or defend Globalisation. (Jagdish Bhagwati)

(ii) those who are critics of Globalisation. (Emanuel Wallerstein, Noam Chomsky, Arundhati Roy, Vandana Shiva, Joseph Stiglitz, Amartya Sen Pratap Bhanu Mehta)

Arguements in favour of Globalisation

views of Jagdish Bhagwati in his book "In defence of Globalisation" He has given quantitative as well as qualitative analysis of Globalisation. According to him those who oppose Globalisation are psychiatrists rather than economists. Globalisation has brought unprecedented level of growth to poor countries. Growth is trickling down. Inequality has started diminishing. For the 1st time in centuries there is a reversal of trend. In support of Globalisation following data can be given.

- Percentage of people living in developing countries on dollar/day has become half in the last 20 yrs.
- Life expectancy has almost doubled in developing world.
- child mortality has declined in every developing region.
- Global literacy was 59% in 1970s. It has become 80% in the year 2000.

Jagdish Bhagwati Admits that Globalisation in itself does not offer solution many steps have to be taken "If properly governed Globalisation is the most powerful social good today.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Imanuel Wallerstein.
According to him, there is nothing new in present Globalisation. It is the continuation of the old capitalist exploitation which is going on since 17th century. According to him, whether it is poverty in Africa or wars in Balkans all can be attributed to capitalists search for market & accumulation of capital.
According to him, Globalisation is passing through its last times. Present rhetoric of Globalisation is swan song. Globalisation is dying its death.
People have only two options ie either socialism or Barbarianism.

Noam Chomsky.
Book - Profit over people.
He has criticised American security policy as a pretext for subsidising the transfer of tax payers fund to major arms dealers. Globalisation has not only impacted people in developing countries but also the ordinary people in America. Many americans have lost their lives in capitalists war.
The states in capitalist countries even go for war to force other countries to open their market for the Bourgeoise in capitalist countries.

Prof. George Heine & Prof. Ramesh Thakur.
In their recent book titled 'the dark side of Globalisation'.
We have not yet reached to the end of history

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

But we are coming closer the end of Geography.

- The developement assistant from north to south in last two decades have been on average dollar 50 bn to 80 bn per year. At the same time there is a per year movement of goods worth $ 500 to 800 bn per year just through illegal channels from countries of south to north. Wage share has fallen, property share has increased Bargaining powers of workers has declined social & economic rights have become weak, property rights have become stronger. In the year 2009. the 3 baltic states have registered negative growth. In Africa the no. of least developed countries remained constant. In Africa illegal exports of minerals, drug trafficking, gun running, & terrorism has increased. Guinea Bissau has become world's first narco state. Globalisation has adversely impacted economic sovereignty, cultural rights, social stability.

- Globalisation has given rise to uncivil society. The rise of organised crimes & transnational network

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Lecture 5th
05/04/2017

Views of Joseph Stiglitz -

Stiglitz has written two books 'Democracy and its discontent' & 'Making Globalisation work'. In above two books stiglitz have highlighted how Globalisation have impacted Inter state & Extra state inequalities. He has also highlighted the Financial crisis in East Asia, S. East Asia Russia, Mexico. He depicted the Democratic Deficit in the institutions of Global Governance. He suggested to address democratic deficit to make Globalisation work. In his recent article Globalisation & its new discontents he has highlighted that how Globalisation has started impacting people in developed countries. According to Stiglitz Globalisation has benefited 1% of Plutocrats in developed countries (Plutocrats → Rich) It has adversely impacted the middle classes & working classes. According to him Median income of full time male worker in USA is actually lower in real terms than what it was 42 years ago. At the bottom level the present wages in real terms are comparable to the level existing 60 years ago. Not just income is moving in wrong direction everything else is moving in wrong direction including health & educational standards. Globalisation has benefited Rich section in developing country. It has benefited middle classes in emerging economies. It has adversely impacted the poors.

alternative description for last. — emerging economy.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

- Arundhati Roy -

Book - Capitalism : A Ghost Story.

According to her, Neo liberal capitalism is a mutant variety of colonialism, Remote controlled & digitally operated. It has worsened poverty & entrenched child labour, eroded democracy & spoiled environment

- Pratap Bhanu Mehta -

In his article 'Globalisation in Question' has expressed views similar to Joseph Stiglitz. The Anti-Globalisation sentiment which was primarily coming from the poors in the south is now coming from the middle & working classes from the North. Globalisation has impacted electoral choices there is a rise of right & left. there is a growth of right wing Xeno-phobia, Anti-immigrant sentiment, ethnic savagianism. It has given rise to plutocracy. Globalisation at its best is an ethical impulse, it is a imagination about the vast opportunities. whereas at it was Globalisation is elites looking for new pasture.

- Amartya Sen -

Countries which have joined Globalisation are in a better position than those which opted out. still the benefits have not been even. In order to make Globalisation a win win situation for all. It is necessary that countries invest in capacity building of the people.

Xenophobia - Racial or ethnic prejudice

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

IMF Managing Director christine legard acknowledged that inequalities are rising & rising inequalities has become achilles heel of market driven Globalisation. She does not she much optimistic future prospect.

Lary Summers of Harvard university recommend to return to responsible nationalism & sensible international cooperation.

Achilles heel - कमजोर पक्ष या — weakness or vulnerable point.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

INTERNATIONAL RELATIONS

- Theory of International Politics as a Discipline.

International Politics is one of the youngest discipline The 1st chair was created in 1914 at University of Wales.

- Purpose of ~~University~~ discipline.

The purpose was to propose theories which can avoid wars & establish peace. Thus, theories of International Politics can also be called as Peace Theories.

- First school of International Politics - Liberalism.

→ Liberalism - why Liberalism?

The objective was to find alternative to existing state of International relations. scholars proposed liberal world order.

- What was the earlier world order.

Earlier world order used to be known as West phalian world order.

- Features of West Phalian World order-

(1) Treaty of West phalia, 1648 which was concluded to mark the end of 30 years war in Europe. gave formal recognition to the nation states and principle of sovereignty of Nation state. #

(2) The origin of International Relations goes back to Treaty of West phalia. International Relations became relations b/w states. The basic principles of west phalian world order were:

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

(a) Nation states as the units of International Politics
(b) For every nation state the ultimate aim was the protection of National Interest.
(c) The core national interest was : Sovereignty & Territorial integrity.
(d) West phalian world order existed in ideal sense till 1st World War.
(e) Till 1st World War there was no international authority. 1st International Political organisation is League of Nations, 1919.
(f) International Politics was in the state of Anarchy Anarchy does not mean lawlessness. Anarchy means absence of world Government.
(g) the state of International politics in the west phalian world order can be expressed through the model of Billiards Ball.

uptill 1st World War International Politics was confined to the European states.

Why?

- USA was following the policy of isolationism (Monroe Doctrine).
- Rest of the world was colony.

Each state was like the ball of billiards. consistantly colliding with the other.

There was no permanent enemy & no permanent friend. What was permanent was national interest. In the absence of any centralised authority or world govt. the only way peace could be maintained was through balance of power.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

What does balance of power?

States have to ensure that the power of one stat does not grow to such an extent that it threatens sovereignty & Integrity of other.

How States will maintain Balance of Power-

(i) Internal Balancing - Increasing its own capability Military, Economy

(ii) External Balancing - Joining / making alliances with others.

there are instances when Balance of Power failed Eg. France under Nepolian become extraordinary o pre-ponderence power. other countries came togethe to defeat France.

Pre-ponderent power

After that Germany under kaisar William tried to gain pre-ponderance/extraordinary power.

Why state try to gain power?

Nations suffer from security dilemma

Why security dilemma?

In the situation of Anarchy states have to depend on self help.

What are the means of self help?

Power. When one state increases power other is bound to increase. situation will arise when they will collide. Hence war is the permanent feature of international politics. States are either in the war or in preparation of war.

To avoid above situations & specially when local wars become world wars. scholars thought to give alternative Hence the discipline of International politics was born.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Theories of International Politics have evolved with the evolution of role of USA in International Politics. Hence, no. of times American scholars claim International Politics as 'American social science'. American Presidents have been proclaiming alternative vision of the world order. (West Phalian).

Vision of new world order-

Since the time of Woodrow Wilson all American Presidents whether Republicans or Democrats have been building the vision of new world order based on liberal ideas with the exception of present president.

Woodrow Wilson's vision of World Order-

Woodrow Wilson's vision of New world order is seen in his 14 points speech in US congress. The prominent ideas are:

(i) Making world safe for Democracy.
(ii) Promotion of free trade.
(iii) Freedom of Navigation.
(iv) Establishment of League of Nations.
(v) Replacing Balance of Power with collective security.

Above vision used to be known as the vision of liberal world order. Attempts were made after 1st world war to implement these visions. League of Nations came into existence. However, nations did not adhered to the liberal vision. League of Nations collapsed & within a span of 20 years 2nd world war started.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Because Liberal vision collapsed liberals were criticised as Idealists or Utopians by realist scholars like E.H. Carr.

- World since the end of 2nd World War.

The then US President Roosevelt gave the vision of new world order based on Liberal principles & experiences of past failure. He proposed UNO, Britain woods institutions.

However, his vision was challenged by the commu-nist world, it was further challenged by NAM countries

Throughout cold war realist view of International Politics dominated. Cold war was symbolised as Nuclear Arms race b/w the two super powers.

- World since the end of cold War.

For the 1st time realist school came under the shadow of Liberal school. The then US president H.W. Bush declared the new world order based on Democracy, Human Rights, Freedom of trade & commerce. Till 2001 world appear uni-polar. The crisis of US led new world order started with the incident of septe-mber 11, 2001. Since September 11, 2001 US has engaged himself in costly wars in Afghanistan & Iraq. US has over strength himself which result-ed into rise of China & other BRICS nations.

- Farid Zakaria suggest that we are living in post American world order. where there is a decline of west & rise of rest. Present world order is uncer-tain. It is said that the new world order is not new it is a continuation of old power politics. It is said that there is neither new nor order today.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Above analysis show that International Politics remain politics among nations & power politics. That is why it is appropriate to suggest that realism has been the hegemonic school of International Politics. & the status of other schools are like footnotes to realism

However at present International Politics does not look like billiards ball. scholars prefer cob-web model over billiards ball model.

What does cob-web model signify.

(i) Emergence of multiple actors.

(ii) Emergence of multiple gate ways.

(iii) Extremely complicated nature of interaction.

What billiard ball model signify.

state centric world. states were the only gateways of interaction.

It is said that we have moved away from state centric geopolitics to Geo centric Global politics.

Geopolitics- more for territory | Geo centric- world as such
Global politics = Economy, Trade.
Geopolitics- Kautilyas Mandal theory, Hitlers foreign Policy.

upscpdf.com

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Short Note - Cob-Web Model.

Lecture 6th
08/04/2017

- Cob-web model is giving an overview of international / Global politics in 21st century.
- Earlier International Politics was explained through westphalian / Billiards Ball model.
- Explain Billiard Ball model.
- International Politics was defined as state centric Geopolitics.
- Cob-Web Model. - since the end of cold war.
- What led to the Cob-web model — Globalisation, Information & Communication revolution.

→ Features of cobweb model.

- Multiple Actors - Multiple/regional org., Transnational Organised crime networks, Transnational Civil society Network.

People are interacting with each other through multiple route. Global Governance looks like Multi plex rather than state centric. we have moved towards Geo-centric Global politics.

Geo politics - Eg. Mondol Siddhant - Kautilya, i.e. politics for territory.
Eg. Russia trying to capture crimea.

28

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Theories of International Politics:

(1) Realism:

What are the salient features of Realist view of international politics.

- Oldest school.
- Hegemonic Discourse
- Basic assumptions are based on west Phalian world order. which can be explained on the basis of Billiards Ball Model.

(i) State centric or statism means states are only actors. even when international organisations or non-state actors exist they are expression of state only.

(ii) Anarchy - structure of International politics is anarchical. Anarchy does not mean disorder. Anarchy means absence of Global Governance.
States are rational actors. (Assumption).
It means states are concerned with their own interest & the core interest is survival.

(iii) Security Dilemma : vicious cycle of insecurity.
International politics is continuous struggle for power.

Intellectual Precursors of Realism:
In Ancient Times

(i) East - Kautilya - Mandal siddhant
- Four Fold Policy
- Shat Gunya Siddhant

Chinese → Sun Tzu (The Art of war).
His views are quite similar to kautiyas.
We can trace strategic culture of china through the work of Sun Tzu.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

(ii) In West

Thucydides - Book - The History of Peloponnesian War (in which Athens was defeated by Sparta)

- Thucydides on Human Nature -

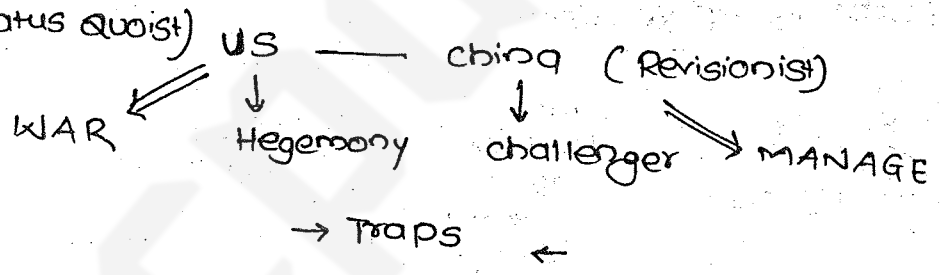

Man is power seeking. consideration of right & wrong have never been strong enough to turn the people aside from the benefits which power brings.

He mentions that what matters is power rather than appeal to justice. In International Politics only self help works. Even God does not help.

In the words of Thucydides, "The strong do what they have power to do, weak accept what they have to accept."

Thucydides have given the view that war is a inevitable feature of politics among states which is now famous as concept as 'Thucydides Trap'.

What is Thucydides Trap:

It is a concept to show that future of the relations b/w the Hegemonic Power & the revisionist power is bound to move in the direction of war.

Why?

Hegemonic power will feel insecure as revisionist power would like to take the advantages of the power it has gained. It would like to alter the rules in its favour.

Revisionist - which acquires power & wants to change the rules. Eg. China.

Hegemony - Eg. Dominance of state in a federation (Australia) - dominance by one country over other.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

What happened in Ancient Greece -
Sparta was Hegemonic Power & Athen has acquired power. It made Sparta insecure. The security dilemma led to the Peloponnesian War.

What is the relevance of Thucydides Trap concept in present context.
At present American scholars & leaders use the concept to predict future of US-China relations.
What is chinese view on Thucydides Trap.
Present President of China Xi-JingPing describe himself as social constructivist & suggest that Thucydides trap need not to be the destiny of major powers. In context of US-China relations he suggest that we should think about "New Model of Great Power Relation" however there is no concrete view that what does new model implies.

Q. Do you think there is a one school of realism or many

Schools of Realism :

- Classical Realism
  - Morgenthau
- Neo Realism OR Structural or scientific
  - Defensive
    - → Kenneth Waltz
  - Offensive
    - → Mearsheimer
- Neo-classical Realism
  - → Fareed Zakaria
  - → Randall Schweller
- Third World Realism.
  - → Prof. Amitav Acharya
  - Mohd. Ayoob.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Classical Realism.

Q. Do you think theory of International politics is nothing but a dialogue b/w Morgenthau and his critics.

Q. Discuss feminist criticism of Morgenthau's realism

Q. Short Note - International politics is nothing but struggle for power.

Introduction.

Morgenthau is known as Father of Realism.
Why?
First person to give the systematic view on the ~~Realis~~ Realist view on International Politics
Book - Politics Among Nations (1949).

Contribution of Morgenthau.
He calls his theory as scientific & gives six laws of realism.

Influence -
He is influenced by Machiavelli.

Purpose of the writting :
His book is like a manual for American Foreign policy makers.
He felt that foreign policy makers should not get complacent or should not develope magnanimity which is natural after victory.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

6 Principles :

① On Human Nature & Relationship b/w politics and Human Nature.
Like all politics International Politics is also based on Human Nature.
What is Human Nature?
Man is power seeking animal. (Animus dominandi).
Hence international politics is an arena where states tries to increase their power.

② On National Interest.
Just like self interest is the prime motivation for human action. National interest is the prime motivation for the foreign policies of the state.

③ On the nature of national interest.
National Interest is a Dynamic concept & the content of Dynamic Interest keeps on changing.

④ Relevance of Ethics
there is no relevance of ethics in politics. there are no universal standards to judge the actions of the nation. Pragmatism is the ethics of politics. We have to see what is correct in a given situation & not what is universally correct.

⑤ On Role of Ideology:
Nations do have ideology but ideology does not have relevance. Nation should not try to impose its ideology or moral aspiration on the others. Because it may create unnecessary problems.

Military power → Economic Power → ideological power.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

(16) On the Field on International Politics

International Politics is neither ethics nor law nor economics. It is an autonomous field. It is uninspiring but that is how it is.

→ Morgenthau has classified states into 3 types:

① Status Quoist. Eg. USA
② Revisionist Eg. China
③ Imperialist. Eg. Germany under Hitler

Morgenthau does not have faith in International organisations & believes that peace is possible only by diplomacy & by balance of power.

Morgenthau has held that International Politics is nothing but struggle for power.

● Critics of Morgenthau:

(*) Morgenthau has been criticised by following scholars

① Stanley Hoffman.

He accuses morgenthau on power monism. Thus Morgenthau's view is not imperically or theoritically sustainable. Because in International politics one see conflict as well as co-operation.

② Kenneth Waltz.

He objects to Morgenthau's method because Morgenthau has made Human Nature as the basis of his analysis. Scientific theory cannot be built on the analysis of Human Nature.

-1971- Quasi- Military alliance with USSR. → left NAM 1971
- Russia- Revanchist state - lost and re-captures.
- for China, India is Imperialist.
- Revanchist - Expansionist.

(3)

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

③ Feminists :
His understanding of Human nature is Masculenist. When his understanding of Human Nature is wrong, his views on International Politics cannot be correct.

Conclusion :
Despite these criticisms we cannot overlook the contribution of Morgenthau to the Theory of International Politics. Morgenthau is a reference point for many contemporary scholars. Hence it is appropriate to say that International Politics is actually a dialogue b/w Morgenthau & his critics.

"International Politics is Nothing but Struggle for power"
- Morgenthau.

- Intro. of Morgenthau.
- 6 principles → Ethics, Nat. Int., Human Nature
- Conclusion.
Views of Stanley Hoffman, feminist scholars.
- we cannot overlook the significance of what morgenthau said

Feminist criticism of Morgenthau -
Scholar- Ann J. Tickner. has reformulated the 6 principles of Morganthau.
What is the essence of her criticism.
Neglect of Ethics by Morganthau.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Reformulations of Principles

(1) on Human Nature.

Morgenthau's understanding of Human Nature is not objective rather culturally defined. Therefore, Patriarchy is a dominant culture. Morgenthau's view on Human Nature is Masculenist. When his view on Human nature is not objective, how can we take his views on International Politics as objective.

(2) on National Interest:

Morgenthau defines National Interest in narrow term of National security and overlook issues of human security.

(3) on ~~National Interest~~ Nature of National Interest.

Add in 3rd principle of Morganthau

Morgenthau has defined National Interest in terms of power. for Morgenthau power is a mean & power is a end.

From Feminist point of view Morgenthau's understanding of power is limited. Power is not just for domination but for collective empowerment.

(4) on Relation b/w Ethics & Politics

we cannot overlook the significance of Ethics in politics & we cannot absolve the politicians from the moral consequences of their actions. thus political actions have to be evaluated from moral standards.

(5) on universal moral Principles.

It is wrong to hold the view that universal moral principles do not apply in case of states.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

universal moral principles have to be applied because humanity will not survive without it. they form the basis of humanity solidarity.

⑥ On autonomy of International Politics.

International Politics is not autonomous of ethics. & Morgenthau takes a very narrow view of politics.

① Precursor- Machiavelli:
- (i) supremacy of National Interest
- (ii) seperation of Politics & Ethics.

From Machiavelli's ideas emerged the concept Raison d etaat (Reason of the state.

② Hobbes - Concept of Anarchy.
- concept of Human Nature as power seeking.

John Herz has developed the concept of security dilemma on the basis of Thomas Hobbes.

Short Note on security Dilemma-

- core concept of realism.
- what is security Dilemma
  structure of IP is such that states are never secured about their security.
- why they are not assured?
  - Absense of common Authority to punish the aggressive.
  - Trust deficit.
- what happens because of security Dilemma?
  Nations will increase their power for their survival.
- what will be the consequence when nation increases its power?
  It makes others insecure so they will also increase their power.
- ultimate conseque will be war. Hence in IP nations are always in war. Either they are preparing for war or they are actually in war.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Contribution by Robert Jervis -

Robert Jervis has given 4 situations to explain the intensity of security dilemma.

Situation is shaped by the nature of environment prevailing ie. Geography, Technology, calculations by policy makers (foreign).

Lecture 7th
09/04/2017

Jervis gives 4 scenarios in context of intensity of security Dilemma -

① When offensive & defensive behaviours are not distinguishable, offense seems to be advantageous. security Dilemma is very intense, Environment is doubly dangerous, Possibility of Arms races is high, co-operation is low, status Quoist status will behave in agressive manner.

② When offensive & defensive behaviours are not distinguishable, defence appears to be advantageous. security Dilemma is intense but not as in the first case. Possibility of Arms races is not that high, State can increase its security, without threatening the security of others

③ Well offensive & defensive behaviours are distinguishable, offense seems to be advantageous, security dilemma is not very intense. However, security issues exist. Environment is safe, agression is possible

④ Offensive & defensive behaviours are distinguishable, defence is advantageous, security dilemma is not very intense, environment is safe, little danger of offensive option, defense budget can be reduced.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Criticism of Security Dilemma:

① By Third world Realists.

→ Prof. Amitabh Acharya & Mohammad Ayoob.

According to them for Third world countries is what is important is not security dilemma but insecurity dilemma is important.

security dilemma is a eurocentric concept. Non-western world faces internal security threats like civil wars, Sussesionism.

It has been suggested that in post cold war environment even european nations are coming under the challenge of insecurity dilemma.

Eg. Trans national terrorism.

② By Social Constructivists.

→ Alexander Wednt

According to social constructivists secu may not be real but it is a result of our subjective understanding. which in turn is a result of a culture in which we live. He also suggest that the concept of security dilemma is past loosing its relevance.

In western world situation has changed as a result of communication & interaction. western world has become one world.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Neo Realism / Scientific or Structural Realism

Scholar. Kenneth Waltz

Book - Theory of International Politics.

Year of Publication - 1979

Kenneth Waltz is known as the Detente Realist.

Purpose of his work:

Between 1962 to 1975 there were many co-operati. actions b/w super powers Eg. Partial Test Band Treaty, 1964; NPT, 1969; Helsinki Accord, 1975

These co-operative actions questioned the relevance of realism. Hence Kenneth Waltz has given the defense of realism as "timeless wisdom". Realism will always remain relevant, this was the purpose of his work.

On what basis he proved that Realism is a time less wisdom.

He proved that realism is a timeless wisdom on the basis of his discretion of structure of International Politics. He described his methodology as Structuralism.

What is structuralism?

Structuralism is a methodology of analysis in social sciences. According to structuralists structures constraints the choices of the Actors

Detente - 2 superpowers also does actions of co-operation.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

What is the structure of International Politics:
Anarchy. It means absence of central authority or world govt. If anarchy is the structure nations will suffer from security dilemma. Hence, International Politics will be struggle for power.

other elements of Kenneth Waltz analysis about International Politics.

① Anarchy & Hierarchy.
Anarchy is the structure of International Politics. & Hierarchy is the structure of Domestic Politics.

② Functional Differentiation:
Functional Differentiation exists in Domestic Politics but it is absent in International Politics. Because all states perform same roles.

③ capabilities
capability determine potential power. states differ in terms of capability. International Politics is primarily shaped by Great Powers.
Kenneth Waltz is a supporter of Nuclear Proliferation. He believes that the presence of Nuclear Weapon insure that the two superpower didn't go for direct confrontation.

Kenneth Watz called his theory as scientific Realism. on what basis?
He criticises Morgenthau's theory as non-scientific. Why?

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Morgenthau's Methodology- Analysis of Human Nature.

Why it is not scientific?

No scientific theory can be made on the basis of Human Nature Because Human Nature is unpredictable.

Why Kenneth Waltz theory is scientific?

He gives Principles of Realism on the basis of Analysis of the structure rather than actor.

(II) Scholar- Mearsheimer.

Book - The Tragedy of Great Power Politics, 2001

Mearsheimer is called as Post-cold War realist.

context of his work -

After the end of cold war liberalism was for the first time in a position to challenge the hegemony of Realism. Never ever the world has witnessed such a level of International cooperation Growth of International organisations & so on. Abov situation questioned the timeless wisdom of realis Mearsheimer tried to re-establish the importance of realist principles as the fundamental principles of the International Politics. Mearsheimer has predicted that the present state of cooperative relations b/w US & china will not continue for long. He has predicted that there is a huge possibility of war b/w US & China in coming years as china is a revisionist state.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

school of thought of Mearscheimer.
He is a structural realist like Kenneth Waltz.
What is a difference b/w Kenneth Waltz & Mearscheimer?
Kenneth Waltz belongs to school of defensive realism whereas Mearscheimer belongs to the school of offensive realism.

Q. Write a short note on the difference b/w offensive & Defensive Realism.

→ Both Kenneth Waltz & Mearscheimer are structural realists. Both believe in the timeless wisdom of realism. Both have similar assumptions w.r.t. International Politics. They both believe that power struggle is a permanent feature of inter-state relations. However, the difference is on -

(I) Purpose for which state require power.

(II) How much power states require?

→ Views of Kenneth Waltz -
He believes that purpose of power is defense & not offense. According to him, defence is a better option.
Why defense is a better option?
Nation can insure its security & could avoid unnecessary power struggle. If nation will persue gaining power mindlessly it will make others insecure & nation may have to face the combined mind of other states.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Hence for Kenneth Waltz Nations are security maximisers. Power is a means of International Politics But power is not the end of International politics.

How much power?

Acquire power only to the extend necessary for the purpose of security

→ Views of Mearsheimer.

Purpose of Power.

like Morgenthau, Mearsheimer believes that power is both Means & Ends in International Politics. According to him, states are power maximisers. Purpose for acquiring power is not security but to gain Hegemony or pre-ponderent status.

Why?

(i) Nation is secure only when it is in a situation of Hegemony & there is a clear gap b/w the nation & its challenger.

(ii) The advantage of power is that one can alter the rules of the game in one's favour.

How much power is enough?

No amount of power is enough. According to Mearsheimer offense is a better policy than defense If offense have not proved a better policy it may be only because of miscalculations. offense & defense has to choosen according to the circumstances. Nations cannot overcome security dilemma. Hence power is both means & ends.

China - No first use of Nuclear doctrine - 1st country.

36

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

According to Mearsheimer, Existing Hegemon can adopt following policies towards rising powers or revisionist powers:

(i) According to Kenneth Waltz balance of power is desirable.

(ii) According to Mearsheimer, pre-ponderence of power rather than balance.

→ Mearsheimer has suggested following options depending on circumstances:

(i) Bait & Bleed
(ii) Blood letting
(iii) Buck Passing

- Bait - Hook - food for fish. Eg. China ⇒ fish - India
- Buck passing - passing the responsibilities to other country.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

- Third World Realism
Insecurity Dilemma concept.
- Neo-classical Realism.
Scholars- Fareed Zakaria, Randall Schecellar.
Neo-classical Realists suggest that we should go for both structure level analysis as well as actor level analysis It will certainly make a difference as to who is taking foreign policy decisions- Hence the study of personalities is also important. Hence, from their point of view foreign policy reflect continuity as well as changes.

→ Criticisms of Structural Realists-
(i) Neo-classical Realism.
(ii) Social constructivism.
(iii) English School.
(iv) Post Modernist school.
(v) Feminist school.
(vi) Marxist School.
(vii) Liberal School.

- Social Constructivism-
Scholars- Nicholas Onuf, Alexander Wendt.
What is
It is a relatively new school of thought in International politics. The term was first used by Nicholas Onuf in his book 'The world of our making'

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

The book was published in context of end of cold war. The end of cold war was very sudden & nobody had imagined that cold war will end in such a manner. World will change from Bi-polar to unipolar. In initial years there were good relations b/w US & Russia. This makes the realisation that we have been living in the world of our imagination.

Source of Influence -

→ Italian scholar vico

According to vico, natural world is made by God. But social world is made by Human Beings. It means there is no objectivity in our thoughts. Our thoughts are product of culture & History. We don't look at world through naked eyes, we look at the world through glasses.

- Emmanuel Kant also held that we cannot obtain the knowledge of this world objectively. as all knowledge gets filtered through glasses.

- Social constructivists aim to explain, "Why we think in the manner we think." AC

According to Alexander Wendt Anarchy is the structure of International Politics — is a construction of realists. The Absence of common govt. has been interpreted in such a way that Anarchy leads to security dilemma. In the words of Alexande wendt 'Anarchy is what state make of it.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

According to Kenneth Waltz there is no natural order which can be studied objectively. The real reason of conflict in International Politics is not the conflict of interest but lack of communication. We need to enter into the debate of ideas we have to understand such ideas which gives rise to misconceptions. Behind conflicts we have to understand the role of institutions, cultures. We need to understand the power of ideas. We need to explore such ideas which can create a better world. We should discard those ideas which are harmful & last the Utility.

- According to Alexander Wendt states are not prisoners of Anarchy.. states have themselves constructed the anarchy in a specific way.

- Post Modernist critic of Realism.

Post Modernism -

According to Lyotard Post-modernism is incredulity towards meta narratives. Post modernists challenge the claims of objectivity & scientific theories. According to Foucult, Theories are discourses as there is a knowledge power connections. Derrida has suggested de-construction & double reading

From post modernist point of view realist view of International Politics is not a scientific explanation it is a discourse. In International Politics Richard Ashley in his book 'Anarchy Problematique' he

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

has challenged the way realist scholars interpret anarchy.

(i) The Absence of coord govt. in itself does not mean that it should lead to security dilemma & power struggle.

(ii) It leads to security dilemma & power struggle because anarchy has been interpreted in a specific way.

(iii) It is a problematic concept because interpreting Anarchy in a specific way results into affirmation of realist point of view.

Realists description of Anarchy is based on no. of problematic inclusions & exclusions.

upscpdf.com

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Lecture 8
10/04/2017

- English School/ International Society
  Scholar - Hedley Bull
  Book - Anarchical Society

Hedley Bull has criticised the concept of Anarchy as given by Kenneth Waltz. According to Hedley Bull, it is not the correct discription of Inter-state relations International Politics is not a complete anarchy rather it is anarchical society. It is neither complete anarchy not complete society but it is somewhere in the middle It is anarchical society because some features of society are also found Eg. there is growth of International organisations, Treaties, Norms, conventions. Anarchical society takes the progressive view of both. Human Being as well as International Politics. As Human Being evolved there is a qualitative change in Human reason & Behaviour

- Feminist Perspective

Feminists are critical of Realists.
Why?
The consequence of Realist approach is such is that not only the theory of International Politics is masculenist. the entire field of International Politics is masculenist. Cynthia Enloe in her book 'Bananas, Beaches & Bases' raises the question - 'Where are the women?'. She also suggest that personal is International & International is person. This show the intact of Patriarchy in the way women are seen in International Politics.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update - https://t.me/upsc_pdf

Women are present in subordinate roles & have been subjected to exploitation. States have subjugated women in variety of ways Eg. Exploitation of women in fruit plantation by MNCs, using women bodies to promote tourism as a means for earning Foreign Exchange. Women as playing the role of wives of Ambassadors, hosting dinners, building soft power, they have been denied the decision making role, thus women & women concerns remain neglected.

Ann J. Tickner has also criticised essential principles of Realism. According to the feminists the way feminist describes security undermines Human Security which in turn undermines women Security. women perspective is altogether missing in policy making in International Politics.

Influence of Feminist school of thought.

Feminist school of thought has been successful in bringing some amount of change. UN security council resolution 1325 recognise the necessity to give essential roles to women in matters of peace & security. It recognise that women have been historically excluded from the decision making. It appeals member countries to integrate feminist perspective in their foreign policies.

Sweden became the 1st country in the world to formally adopt Feminist foreign Policy. According to Swedish Foreign Minister, Margot Wallstrom, Feminist Foreign

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

policy looks at women not just as victims but as agents of change. It recognise the existing gap b/w traditional understanding of security & actual experiences of persons in conflict zones. It aims at protection of Human Rights which actually means women rights.

The so called Hillary Doctrine also treated that Human Rights / women Rights should be the integral component of US foreign policy, that is specially in the context of dealing with the countries of middle east

Nirupama Rao - Feminist foreign Policy in S. Asia - Article.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

⑥ Liberal Perspective of International Politics-

Realist → Peace

Purpose of Liberal school of Thought-
Prescriptions for Peace.

- Sources of Influence-

① John Locke
Enlightened view of Human Nature.

② Immanuel Kant
Pamphlet - Perpetual Peace - where Kant has given the idea how to establish perpetual peace among European Nations. Through,
(i) Free Trade
(ii) Propotion of Republicanism.

③ Richard Cobden.
He suggested that if we have to solve the conflict the 1st step is to keep the politicians out.

④ Norman Angell.
Book - The Great Illusion
In the book he has suggested that war is not even beneficial for the victors.

⑤ Woodrow Wilson.
refer previous
In his 14 Points speech he has given various ideas.

- Schools in Liberalism.

① Liberal Institutionalism.
Scholars - Woodrow Wilson, Joseph Nye

② Sociological Liberalism.
Scholar - Karl Deutsch

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

③ Functionalism
Scholars- David Mitrany, Earnst Haas.

④ Republican Peace / Democratic Peace Theory.
scholar - Michael Doyle

⑤ Interdependence
Scholar- Thomas Friedman, Richard Rosecrance

⑥ Complex Interdependence -
Scholar- Robert Keobanne, Joseph Nye.

---

① Liberal Institutionalism.

→ What is the proposal?
Proposal is to build International Institutions to contain the Anarchy.

→ What is the Advantage?
In the words of Woodrow Wilson, "It can convert Jungle into Zoo."

(i) Institutions provide a platform for dialogue otherwise the only field available is war field.

(ii) It is believed that most of the problems are because of lack of communication. Platforms provide opportunity for regular dialogue.

(iii) When a country makes promise to International community it is not very easy to defect.

→ Actual Performance.
Since the end of cold War we see phenomenal rise in the no. of institutions. This show the overwhelming support for the idea in International community.

41

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Institutions like UN, ASIAN, WHO, BRICS etc. play role of in establishing rule of law in their sphere atleast in limited sense.

Hedley bull recognises role of institutions in converting International Politics from Anarchy to Anarchical society.

However, there is huge dissatisfaction with the working of these institutions. Hence, Liberal institutionalism cannot provide the alternative. Despite existence of institutions like UNSC, Nations continue to acquire military power. Just because UN exist it has not made self help irrelevant.

Where is the Problem?

(i) Institutions have been used by nations for promotion of narrow National Interest.

(ii) Most of the institutions lack representativeness & transparency.

(iii) Experience show that the countries which trusted institutions have to suffer Eg. India in case of Kashmir.

(iv) Institutions lack funds, mandate & expertise to perform their functions.

Joseph Nogee suggest that Nations are not interested in Negotiations. They go for quasi-negotiations to avoid the blame. Hence, there is a limited productivity of such efforts.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : -https://t.me/upsc_pdf

② Sociological Liberalism / Communication theory

→ Context:

Since Nations have their own compulsion some scholars suggested to shift attention from Nations to society. from Track 1 to Track 2. Not just communication b/w states but b/w society.

→ What is the relevance to go for dialouge b/w societies?

The relevance is because world order is changing.

What change?

From state centric to society centric world order.

(i) Rosenau - has suggested that world order is changing people are not living in state centric world, people are developing multiple identities & multiple loyalties there is a growth of Global citizenship, Transnationalism.

(ii) John Burton - has suggested that the world does not look like 'Billiard Ball' model' rather it looks like Cob Web Model. Billiards Ball Model was given by Arnold Wolfers & Cob Web Model was given by John Burton cobweb model also show that the world is becoming society centric. State is not the only gateway through which people interact. the Governibility of Nation state has declined considerably.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

→ Contribution of Karl Deutsch.

(i) He has given the concept of security community.

(ii) security community is alternative to security Dilemma.

Examples of security community:

Western Europe, North America, Western Europe & North America (Trans Atlantic community)

In 2015 ~~ASEAN~~ ASEAN declared itself as a community.

the members of security community do not feel that they are threat to each other rather they feel they have common threats existing outside.

How Security Community emerges?

According to Karl Deutsch, it emerges through communication. He has actually measured the communications by measuring the no. of International travels, letters exchanged, phone calls. Higher is the communication greater is the feeling of community

What is the suggestion?

Increase communication b/w societies. Eg. Visa liberalisation. Promote people to people contacts.

Relevance in South Asia-

It is an option worth trying in South Asia. It is believed that only by promoting people to people contacts b/w India & Pakistan we can remove apprehensions agdinst each other.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Chances of success-

Uncertain. Because there are vested interests in both the countries.

South Asia is also one of the 1st places where security community concept has been applied. Eg. w.r.t. Nepal & Bhutan. However, in case of Nepal it has not resulted into any strengthening of the relations.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

(3) Functionalism / Peace by Pieces.

Functionalism is based on the experience of European union. It is influenced by ideas of Richard Cobden who suggested to keep the politicians out.

Functionalism as an approach is based on following concepts :

(i) Peace by Pieces. which means look for different issues. categories this issues into the issues of low politics & high politics. First take up the issues of low politics. Give leading ~~to~~ role to non-political groups like Technicians, scientists.

(ii) Spill over effect - once nation will realise the benefits of cooperation in one field they will go for cooperation in other field. It will develope 'functional linkages'. It will create an environment which is conducive even for resolution of conflict on the issues of high politics.

(iii) Functionalism supports the idea of functional sovereignty. Instead of monistic sovereignty where state has ultimate power in all sectors, shift decision making power to the expert bodies.

Above approach was applied in European union which has ultimately resulted into qualitative transformation in the ~~relations~~ nature of inter state relations.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

→ Limitations-
It may take extra ordinary long time. It requires lot of patience & political will.

• Neo-Functionalism-
scholar- Ernst Haas.

He suggest that it would not be possible to sustain the process for long without bringing the politicians. on the basis of experience of European union it can be said that there have been occassions when integration process got stagnated and integration could not have moved forward had leaders not shown the political will.

→ significance- the strongest existing alternative to realist politics.

→ Relevance in India & Pakistan (South Asia).
In case of India & Pakistan the approach was applied in the form of composite dialogue process. which was based on 2+6 framework. there has been substantive gains in substantial gains of composite dialogue process in very short term. It is in this context that vested int. were compelled to take step like Mumbai terror attack that it becomes extremely difficult for India to sustain the dialogue process.

- composite dialogue — voluntary set. - peace by piece process.
- issues with pak. - sir creek, fishermen, MEA, culture etc.
- Kashmir - non-triality.
- solution - power of attraction rather than power of coercion.

44

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Democratic Peace theory / Republican Peace theory

Scholar- Michael Doyle

→ What is the idea ?

Democracies do not go for war with each other.

→ can this theory be supported by facts ?

We can substantiate the theory by facts as no major democracy or mature democracy has gone for war with each other. Was happened in Europe till there were monarchies & Autocracies.

→ What is the logic ?

views of Michael Doyle.

(i) In Democracies people are treated not as means but ends.

(ii) Democracies recognise freedom of speech & expression Hence, there is a scope of course correction.

(iii) There is a pressure of Public opinion.

(iv) Democracies promote culture of peace & tolerence.

(v) Democracies form zone of peace . means existence of a democratic culture.

upscpdf.com

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Lecture 9
01/04/20

Implication :

If more no. of countries are democratic it is better for world peace.

Criticism:

It is most criticised theory.

Why

(i) Based on insufficient logic. Democracies have not gone for war with each other, it may have been just a coincidence.

(ii) Only Democracy is not the reason other factors like free Trade, common External Threat may have also played the role.

→ Worst aspect / part of the theory

(i) It provides legitimacy to US attempts to provide/make Democracy at Gun Point (Bush Doctrine). Eg. US attempts to introduce Democracy in Iraq has destabilised the entire middle east.

(ii) Countries like china & Russia suggest theory providing justification for US attempts at regime change & to install poppet govt. US paradox is evident as it has been supporting the dictators & Monarchies in the middle east. US could never reconcile with Democracy in Iran.

→ Should Democracy promotion be India's aim in neighbourhood & otherwise?

(i) India has also attempted Democracy promotion in neighbourhood Eg. in Nepal, Sri Lanka

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

(iii) After the end of cold war India joined a platform lead by USA for Promotion of Democracy ie. Conference of Democracy.

(iii) India is one of the leading contributor to UN Fund for Promotion of Democracy.

It has been suggested that as far as neighbourhood is concerned India should follow 'Panchsheel' ie. Non-Interference in Domestic affairs.

Democracy in the subcontinent have proved to be more challenging because it allows Political Parties in neighbouring states to play China Card.

Since Democracy in Maldives India's relations have deteriorated with Maldive. & since Democracy came to Bhutan relationship have become more uncertain.

Democracy promotion in Myanmar before 1990s proved detrimental to India's internal & external security.

Is it good if there is Democracy in Pakistan?

There are two schools of thought:

(i) When army is in power they will feel more secure & relations will be more stable.

(ii) If Democracy comes in Pakistan it is good for India because civil society of pakistan is the only hope for India. However, it should be Democracy in real sense.

On its part India should not make any gesture about strengthening of Democracy there because it will make army insecure & there can be a rolling back of Democracy.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Govt of India should understand the compulsions of civilian Govt of Pakistan & should not press for the issues which are not under their control.

④ Interdependence -

It means economic Interdependence.
Source of Inspiration.
Immanuel Kant who suggested promotion of free Trade.
Exponents -
Thomas Friedman, Golden Arches Theory.

→ Golden Arches Theory - The two countries having Mc Donald chains will not go for war with each other
Why?
According to fried man people will prefer standing in que for Burgers rather than going for war.
However, in real sense it means Economic inter-dependence will grow that wars will become less attractive.
Is there any example?
According to the scholars since 1990s there has been qualitative improvement b/w India & China because of Growth of Economic Interdependence.
If we compare Line of Actual control & Line of control. LAC is almost always a peaceful boundary.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

→ Economic interdependence in context of Pakistan-
Since Economic interdependence is very less.
Countries do not have stakes in each others
stability. Hence, it is easy for them to Break-
off the relations & go for low intensity warfare.

→ Manmohan Doctrine w.r.t. Pakistan-
He wanted Economic Interdependence. Govt want-
ed than Pakistan gives MFN status to India. steps
to promote investment from Pakistan, promotion
of trade & commerce, cross LOC trade, VISA Lib-
eralisation for Businessmen.

→ Richard Rosecrance-
He has given the concept of Trading states.
Examples of Trading states- Germany & Japan since
2nd World War.
Opposite of Trading states is Military states-
What is the proposal of Richard Rosecrance?
He suggest to promote Trading states. Japan & Ger-
many are major powers on economic basis. Country
should not focus too much on military power. He
gives the example of former USSR which has over
stressed itself militarily. We can also add the
arguement that since USA has gone for greater relia-
nce on Military Power, it has overstressed
itself resulting into decline of US Hegemony.

Iran
↓
shia

S. Arabia
↓
sunni

USA do not accept Democracy but the popper wars in Iraq.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

'For long china has also persued the policy of 'Peaceful Rise'. It allow china to emerge as major power.

⑤ Complex Interdependence Theory -

→ Nature of the Theory.

Descriptive.

Rest of the theories were prescriptive.

What do they describe ?

The Nature of the post cold War World order.

Significance.

So far the best description of Post cold War World order & the nature of relations.

What is complex interdependence ?

At present countries have become interdependent in an extremely complicated manner. The relations b/w US - Russia, Russia - china, US - china, India - China. All can be explained through Complex Interdependence.

Complex Interdependence is a situation where one is forced to love whom one would otherwise love to hate

Implications -

① Countries have got interlinked in such a way that the cannot persue an independent path.

② Old theories have become irrelevant. Now it is not possible to celebrate when neighbours house is burning.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

(iii) show that old conflicts are continuing but new challenges have emerged like Climat change, Global Terrorism which force countries to co-operate with each other.

→ Exponents -

Joseph Nye & Robert Keohanne

They describe following features of complex interdependence -

(i) Security issues have not gone into irrelevance However, today economic security dominates over military security.

(ii) International Politics have become pluralistic which means state is not the only actor there are other actors also.

(iii) Relationship is not just of struggle but there is also a co-operation.

(iv) World is not complete anarchy but it is in a situation of complex interdependence.

Q. What is the status of Liberal World order at present

(i) Constituent elements of Liberal world order.

free Trade, Freedom of Navigation, Promotion of Democracy, Protection of Human Rights, Rule of law.

Liberal World order is an alternative to west phalian world order.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More:Update : - https://t.me/upsc_pdf

Exponents -

Based on the ideas of Immanuel Kant.

1st formally presented in 14 points speech of Woodrow Wilson.

It has been USA's vision to build liberal World order since USA involvement in World Affairs.

Evolution of Liberal World Order -

John Ikenberry has given the evolution of Liberal World order in three phases.

(i) Liberalism 1.0 → When after 1st World War League of Nations was established & for the 1st time the idea of collective security came into existence. However, it could not continue for long as USA had to go back from World Affairs & European Nations reverted to old politics.

(ii) Liberalism 2.0 → After 2nd World War
Eg. Establishment of UN, IMF, WB, UNDHR
→ Spread of Liberal World Order -
It remained limited to the western world. It was challenged by the 2nd World and 3rd World (Communist & NAM resp.)

(iii) Liberalism 3.0 → emerged in its strongest form after end of cold war. Eg. Establishment of WTO, UNHRC, ICC (International Criminal Court) Regional organisations

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

→ Present status:

liberal world order is in crisis.

Since when?

Since 2001.

→ Challenges:

(i) Islamic Fundamentalism (Clash of civilisation theory by Samuel P. Huntington)

(ii) Contradiction by Globalisation (Immanuel Wallerstein held that liberal world order is moving towards its end (Swan song).

(iii) Decline of US Hegemony.

(iv) Rise of revisionist state. ie. Russia & china.
Russia is challenging the order in Europe, china is challenging order in Asia Pacific. Iran and ISIS challenging order in middle east.

Current status -
Worst time for liberal world order.
Why?

(i) Rolling back of liberal world order in its core areas.
Eg. Foreign Policy of President D. Trump.

(ii) Crisis in European union.
Economic recession/crisis, Impacts of the crisis in middle east has led to the question mark on the basic values of EU. about human rights open border.

(iii) the rise of rights & rise of left, Anti-immigration supplements.

According to Ian Bremmer we are witnessing geopolitical recession and no order period.

According to Robert kagan, liberal world order is fragmenting under the pressure of systemic economic stress, ~~going~~ growing tribalism, nationalism, loss of confidence in international institution & long & midde sized powers in their own regions.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

The future of liberal world order has been the main concern among the scholars & leaders at the Munich security conference (Feb 2017). In the conference participants have expressed concerns over future of Liberal Democracy, opening o economy, multi-lateralism like Trade deals, Paris Climate change Agreement.

Should Liberal World order exist from the perspective of India?

Liberal World order is in the benefit of all. Liberal World order is always beneficial for India. It is in India's benefit if multi lateralism gets strong. However liberal world order can be protected only when liberal countries show real commitment to the values of liberalism should go for necessary reforms in the institution.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Marxist Theory of International Politics -

In Marxism politics is the element of superstructure. Hence, they focus on the analysis of economic structure. Hence, it is better to call Marxist theory of International Politics as Marxist theory of International Political Economy.

What is the core concern of Marxist scholars?

Their focus is on analysing the working of capitalism in International context.

→ Role of Karl Marx -

He has not given any detailed view over the working of capitalism in International context yet he believe that capitalism is inherently expansionist. In the words of Karl Marx, Imparatives of capitalism force Bourgeoise to nestle every where & settle everywhere. Marx did talk about Proletarian Internationalism.

→ Contribution of Lenin -

The real credit for developing Marxist perspective of International Politics goes to Lenin's theory of Imperialism. Lenin has established imperialism as highest stage of capitalism. Lenin has shown that 1st world war was actually capitalist war for colonies.

→ Rosa Luxemberg

In her theory of imperialism has shown the interdependence b/w capitalism, militarism, Nationalism & imperialism.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

In Marxism there are 3 traditions:

1. Instrumentalist.
2. Gramcian
3. Critical School.

1. Instrumentalist / Dependency school.

Dependency school scholars analyse the phenomena of Neo-Colonialism & developement of underdevelopement.

Among the prominent scholars of Instrumentalist approach we can mention Immanuel Wallerstein who has given 'world system theory'

→ World System Theory-

(i) Instead of studying foreign policies of Individual states it is necessary to understand the nature of world system.

(ii) Wallerstein gives two examples of world system.

(a) Uptill 17th century World system was political

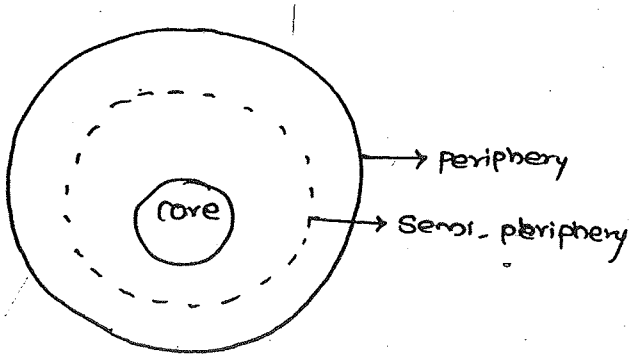

(b) since 17th century World system has become economi

Feature of present World system.

Wallerstein gives 3 dimensions.

(i) Spatial Dimension:

countries of the world can be categorised into 3 groups. ie. Core states, Peripheries, & Semi-peripheries.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

→ Core Countries - Industrial, Military, Political, Economic, Technological power.

→ Peripheries - Poor countries of Global South, Suppliers of Raw Materials & Markets for finished goods.

→ Semi-peripheries - They are some countries of the south which have been benefited by the process of Globalisation Eg. India, China, Brazil. semi-peripheries work in the interest of North they have been shock absorbers for western capitalism.

(i) Adversely impacted working classes in western countries
(ii) Adversely impacted middle classes
(iii) Adversely impacted poor countries Eg. Africa, latin America
(iv) they have offered a space for utilisation of outdated technology.
(iv) they became semi-peripheries because they have some pool of skilled labour, some amount of manufacturing base.

(2) Temporal Dimension

Every system has its origin, rise & decay. It is assumed that since 1990s there is a rise of capitalist Globalisation but actually it is moving towards its own decay. The end is very near. Humanity has only two options ie, Socialism & Barbarianism.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

③ Geo-culture

World system has been supported by the Geo-cultur the two dimensions of the Geo-culture of the present are:

(i) Liberalism.

(ii) Science.

Both promote capitalism.

Thus for Immanuel Wallerstein we cannot explain poverty in Africa or wars in Balcan without understanding the operation of Global Capitalism.

→ Criticism of Wallerstein's Theory.

Lecture 10
12|04|2017

(i) Marxist approach is criticised for "Economic Reduction"

(ii) Post colonial scholars criticise marxism & other mainstream theories as Eurocentric. Means based on experience of Western countries.

Present Status.

Chase Dunn has tried to incorporate social, geo political factors in instrumentalist approach to make it more relevant.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

② Gramscian Theory

In orthodox Marxism role of superstructural factors or ideological factor has been neglected.

In International Politics Robert Cox has applied Gramscian tradition in his article the social forces state and world order; Beyond International Relations Theory publisher in 1981 he has shown the role of ideological factors in general & in USA's Foreign Policy which provides basis for domination by USA

In his famous statement, "Theory is always for someone & it always has some purpose." He has shown that mainstream theories like Realism or liberalism do not explain International politics in an objective manner. They are written from the perspective from those who are benefited by these theories. He has shown how ideological power operates behind material power with the example of US Hegemony.

① US Hegemony is based on the economic power. USA has strengthened the economic power by promoting the idea of free trade as if it is in the interest of all & USA is a protector of free trade.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

③ Critical School or Emancipatory Vision -

Scholar - Andrew Linkater.

Source of Influence - Habermas

Concept - Radical Democracy or Grassroot Democracy.

According to Linkater, Problems of wars are because of the concept of territorial nation states. Hence, the solution is to make territorial boundaries irrelevant. He suggest to create new moral boundaries. He also believes that only by empowerment of masses at the Grassroot level we can find solutions for peace.

Scientific Approaches -

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Scientific Approach -

(1) Systems Approach / Behavioural Approach / positivism

→ What is system's Approach in International Politics-

System's Approach International Politics is primarily associated with the work of Morton Kaplan. It is influenced by General systems Theory & the concept of political system given by David Easton.

→ What is the idea?

Idea is to study international politics as a system rather than analysing independent foreign policy.

→ Why systems Approach will be relevant?

(i) According to Morton Kaplan systems Approach is relevant for study of International Politics because the nature of International Politics is inter-disciplinary & systems approach provides a Framework for inter-disciplinary study.

(ii) Systems Approach is free from ideological or normative pre-occupation.

→ What was the objective of Morton Kaplan?

He wanted to Build the Grand theory of International politics. Theory which can explain politics in a Holistic manner & politics of past, present & future.

Grand theory. Eg. Newton's theory of gravitation which is universal

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update :- https://t.me/upsc_pdf

→ What is his contribution?

He developed 10 model of International Politics. He explained the features of the model. According to him Every model has five variables

→ Five variables -

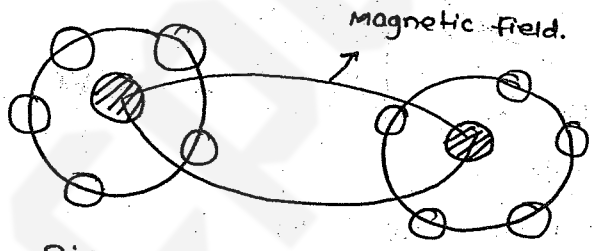

(i) Essential rules of the system.
(ii) Transformational Rules.
(iii) Actor variables.
(iv) Capability Variable.
(v) Information Variables.

He also suggested that International system is overarching complex, dynamic, adaptive & purposive.

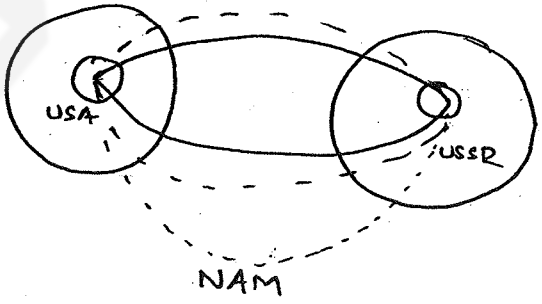

→ 10 Models given by Morton Kaplan.

(i) Balance of power system. (Billiards Ball Model Features) Explain:
It was existing in Europe till first World War.

(ii) Bipolar World -

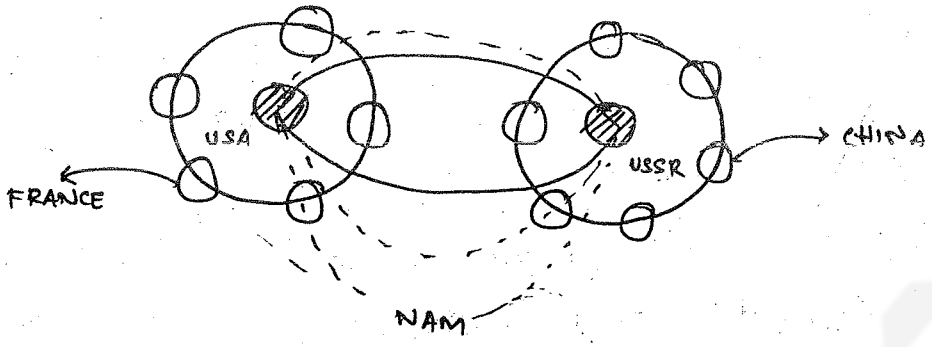

(iii) Loose Bipolar

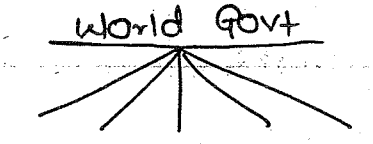

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

(iv) Very loose Bipolar

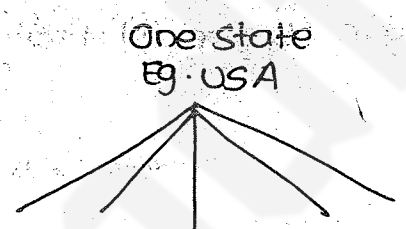

(v) Universal Actor Model.

190+ Countries of the world.

(vi) Hierarchical Model.

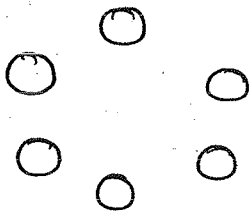

It is opposite of Universal Actor Model.

All countries under one state./country.

(vii) Unit veto Model.

- opposite of Hierarchical Model.
- Each country becomes equally powerful.
- All countries have equal capacity to destroy.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

(viii) Detente System.

- It means relaxation of tensions b/w ~~countries~~ super powers.
- Between 1969 to 1979.

(ix) unstable Block System.

- Opposite to Detente System.
- It symbolise the beginning of 2nd phase of world cold environment is dangerous & uncertain, Hostility is high.

(x) Incomplete Nuclear Diffusion Model.

- Hypothetical situation in which around 14-15 countries posses Nuclear Weapon.

→ Criticism

(i) According to Stanley Hoffman, systems Approach is huge missstep in the right direction. It is a strange form of Parlour game, remote from the reality to be tested. It does not even captiure the basic stuff of the politic There is a tendency to reduce politics to what it is not It is a victory of form over substance. It does not eve fulfill the basic demands of systems Approach. It neither tells the characteristic of the system nor its processes, its boundary or environment. It also does not suggest how international system differs from other system.

(ii) Lieber

(a) There is a gap b/w theory & research.
(b) Lack of operability.
(c) Model ignores domestic variables, historical ideological factors shaping international politics.

54

detente - relaxation of tensions.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

not in syllabus.

(2) Game Theory

scholar - thomas schelling.

→ Type of theory – scientific

→ What is the objective?

To predict rational behaviour. It is based on realist assumptions. They project international politics as a game.

What type of game?

It is a game of strategy. Every game has its payoff. Every game has its saddle point ie, point at which players decide.

In International Politics scholars have developed following models.

(i) Zero sum game.

(ii) Non-zero sum game.

(iii) Two persons or 'n' persons theory.

→ In International politics the most two well known models are:

(i) Chicken Game.

(ii) Prisoners Dilemma

(i) Chicken Game is based on 1962 Cuban missile crisis

It predicts the rational behaviour.

Situation - Head on collision.

What is the dilemma?

Prevent catastrophe, prevent loss of prestige.

Rational acting will be not to worry about prestige.

Non-zero sum game – Profit for some & loss for some.
Zero sum game – Eg. Kashmir issue

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

(ii) Prisoner's Dilemma.

Theme, situation of states is like prisoners. They have no way to completely understand the intentions of the other. Huge trust deficit exist. They are not able to take action, what is best for them rather would like to avoid the worst outcome.

Eg It was used to predict whether India & Pakistan could go for building nuclear weapons.

Why there was a doubt?

- India's advocacy for comprehensive nuclear disarmament
- Both India & Pakistan are poor countries. They should use their resources wisely.
- If both of them do not develope, it will be a win-win situation as nuclear weapons are not going to use.
- Since there is a huge trust deficit they will opt for nuclear weapon.
- International Politics is such where co-operation is not as beneficial as defection.

(a) Both co-operate & do not make.

(b) India defects & makes Nuclear weapon it will be detrimental for Pakistan not to have nuclear weapon and vice-versa.

Decision

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

③ Decision Making Approach.

Scholars - Richard Snyder, HW Bruck, Burton Sapin.

→ What is the focus of Decision making approach & analyse foreign policy?

→ What is a foreign policy?
It is a decision making process.

→ What is a decision making process?
Decision making means looking for problems & looking for alternatives it is a proactive approach

Foreign policy making is not problem solving.
Above scholars have analysed decision making process in different countries. Role of different factors, like environmental, organisational.

④ Post Colonial Approach.

What is post colonialism?
Post colonialism is the reaction against make mainstream theories of International relations. By the scholars of third World / Post colonial world.
What is their concern?
Colonialism has re emerged in the form of post colonialism
What is the state of post colonial world?
No change in the nature of societies & interstate relations.
Where is the problem?
People in post colonial world lack independent thinking. they try to understand their present on the basis of concepts & explanation given by western countries. these concepts are neither relevant for our history nor for our presence. In fact when we apply these concepts like security dilemma, anarchy they are problematic. if we look from the perspective of person living in Baghdad, IP is not anarchy. It is dominated by the western countries.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

→ What is their concern w.r.t. the discipline of International politics?

(i) Out of all disciplines it remains eurocentric.

(ii) There is a arrogance among western scholars. Eg. Stanley Hoffman claimed International Relations as American social science. Morgenthau held that Africa is politically empty. Kenneth Waltz held that it is ridiculous if we make theory of International Politics on the basis of foreign policy of Malaysia or Costarica

(iii) Western scholars have willfully neglected the study of post colonial world because it perpetuate neo-colonialism.

→ What do they want? (Post colonial scholars)

They want to decolonise the discipline of International relation. They want to bring sub-altern perspective. They want to bring the concerns of post-colonial world on prominence. Poverty, environmental degradation, exploitation by the MNC's should be the main concern. There is a need to develope new concepts like insecurity dilemma based on the experiences of non-western world.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Key concepts in International Relations-

(1) POWER

Q. Determinants of power or elements of power.

(i) Geography-
Size, resources, population, location.

(ii) Economy

(iii) Military.

(iv) Technological

(v) Social structure.

(vi) Political stability.

(vii) Intelligence. (Agencies).

→ Difference in Elements & Determinants-
only when elements of power are used to increase country's power in a skillful manner, element becomes determinant.

→ Measurement of Power:
though difficult to measure yet necessary, there is always possibility of miscalculation.

→ Classifications of Nations/Countries on the basis of their power status:

(1) Super power-
Eg. USA. Superpower is a extra ordinary power. Others cannot challenge even in competition. Super-power has capacity of military intervention.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

② Great Power.
Eg. Russia, India, China, Britain
It means country which has capacity to protect its interests on its own.

③ Middle Power.
Eg. Pakistan, Israel.
Can protect their National Interest in combination with other countries.

④ Small power-
Eg. Nepal, Sri Lanka.

→ Types of Powers:

① Hard Power
② Soft Power
③ Smart Power.
④ Fast Power.

Assignment:

Q. India's soft power.
Source- Hindu public Policy centre.
Article- Trider Singh Maini

Q. What is public Diplomacy.? & What is its relevance?

Q. What is Fast Track Diplomacy?
Source- MEA.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Comparison b/w Hard Power & Soft Power; Lecture 11

18/04/2017

(i) Basis of Hard power is materialistic. However, for soft power is Idealistic.

(ii) Hard power is in the control of the State so it can be operationalise at the will of state. whereas soft power is diffused throughout the society & is not at the will of state.

(iii) Hard Power has compelling Nature, soft power is voluntary. It may not compel others to do what States wants.

(iv) Results of Hard power may be immidiate, whereas results of soft power may be realised in long term.

(v) Hard power is resource based.

→ Which power is more relevant in 21st century?
According to Joseph Nye, Soft power.
Why?
World order has changed in the age of complex inter-dependence the scope of soft power has increased considerably & scope of use of Hard power has reduced.
According to Joseph Nye, world today looks like 3 dimensional chess Board.

(i) World is Unipolar - basis - Military
(ii) World is Multi polar - basis - Economy
(iii) Social power diffused - basis - Democracy, IT, Public Diplomacy.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

→ Why soft power is better?

(i) Cheaper

(ii) If soft power may not work there is no guarantee that Hard power will work.

(iii) The country using hard power force others to build coalition against it & sympathy develops for the adversery

According to him, the biggest reason for the decline of US Hegemony in 21st century has been excessive reliance on Hard Power.

→ Smart Power-

Joseph Nye, modified his views & acknowledged that soft power alone will not work. Hence, he suggest combination of Hard & soft power. Joseph Nye, defines smart Power as an approach which under scores the necessity of Military Power But invest heavily in alliances, partnerships & institutions.

Former US secretary of state Hillary Clinton, describe soft power as skillful use of diplomatic, military, political, legal, cultural.

Obama Administration made 3 Ds as the pillar of Foreign Policy.

(i) Defence (ii) Diplomacy (iii) Developement.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

→ Fast Power:-

scholar- John Chipman

He suggest that we are living in an age where "speed" has become the determinant of National power.

Today what matters is speed & not heft. He gives the principle of Neo-Darwinism which means 'survival of fastest. What is important is how agile we are?

However according to the critics of soft Power well considered patient options are more rewarding than ill considered Hasty options.

→ Polarity of Power Theisis-

What is polarity?

It denotes the distribution of power in the world order. There can be 3 models.

(i) Unipolar (ii) Bipolar (iii) multi Polar.

What is the theisis?

Structural realists like kenneth Waltz & Mearsheimer suggest that Bipolarity is best from the perspective of stability & World Peace.

Arguements in support of theisis"

Analysis of Unipolarity:

According to some scholars unipolarity may be desirable as single super power acts as a Global policeman, establish law & order. Unipolarity followed

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

after the end of cold war. It provided opportunity for other countries to rise. However, unipolarity is not stable.

Why?

(i) Single Super power will overstretch itself to maintain the order, this will be opportunity to the free riders. to challenge the Hegemony.

(ii) With Great Power on one hand comes great responsibility but at the same time comes Megalomania. the super power start destroying the rules of the order which it has built.

Analysis of Multipolarity -

Multi Polarity is never stable. More players, More Misunderstandings, More misscalculations, more wars.

Analysis of Bipolarity -

Most stable. The two superpowers will establish rule of law in their own sphere. less No. of fingers on Nuclear Button, less chances of confussion, deterrence can work effectively.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Management of Power -

1. Balance of Power.
2. Deterrence
3. Collective security

1. Balance of Power.

→ What is the relevance of Balance of Power in 21st century?

(i) Realist concept for peace.
(ii) Militaristic concept.
(iii) It is considered as the Fundamental law of International politics like Newton's law of Gravity.
It is also called as axiom of International Politics.
David Hume, called Balance of Power as common-sense it will remain relevant so long commonsense is relevant.

→ Balance of power is based on the realist assumptions.

(i) International Politics is in the state of Anarchy.
(ii) Nations suffer from security Dilemma.
(iii) self help is the way of survival.
(iv) Power is an end power is a means.

→ What are the techniques of Balance of Power? country may go for -

(i) Internal Balancing.
(ii) External Balancing.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Internal Balancing is more reliable than external

Ideal conditions for Balance of Power.

(i) It works in a regional setting.

(ii) It operates ideally when there are 5-6 major power. Each nation is concerned about protection of its sovereignty & territorial integrity.
They are ready to go for war for the sake of protection of their sovereignty.

What are the traditional techniques of Balance of Pow
Based on the experience of West Phalian world order as found in Europe. techniques are:
Arms Race, Disarmament, Alliances, Counter-Alliances, War, Partitioning a territory, creation of Buffer Zone.

Relevance of the Balance of Power-

(1) Perspective of Liberals-
they are critics of Balance of Power.
the prominent critics include Woodrow Wilson, P. Nehru.
According to liberals, Balance of power does not offer a permanent solution for International peace.
According to P. Nehru, Balance of Power gives Nervous state of peace. According to the critics of Balance of power it innocculates against measles but give rise to plague.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Why there is a question mark on the relevance?
The ideal conditions meant for Balance of Power have ceased to exist specially after 2nd world war.
What happened after 2nd World War?
World became Bipolar.
Ideal conditions cease to exist.
What are ideal conditions?
Regional politics, 5-6 major powers, conventional wars when superpower comes the status of states gets to satellite. No point balancing against superpower band wagoning is a better option. Once Nuclear weapons comes in to picture the traditional techniques will not work because of Nuclear weapons. During cold war a new type of Balance got established b/w the 2 super powers which is known as 'Balance of Terror' or 'Nuclear Balance' based on the #concept of MAD (Mutually Assured Destruction) However during cold war, Balance of Power did operate in concepts of regional setting like Middle East, South Asia.

Relevance of Balance of Power in 21st century?
New conditions have developed.
(i) Unipolar World.
Nations will not go-for hard balancing against single superpower. They may go for soft balancing political opposi?
In 21st century non-conventional security threats have emerged like terrorist actors. Where traditional Balance of power concept will not apply.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Realist scholars have coined a new concept 'Assymetrical Balancing' in context of non-state actors., which means states organisations are co-operating against non-state actors.

Conclusion:

In 21st century Balance of Power does not work in a ideal sense but if we understand Balance of Power as countries going for acquiring conventional weapons in regional situations to avoid Black mailing by regional Hegemons it does exist. It has not altogether lost the relevance, conventional wars have not become out of context altogether. Hence, Balance of Power will remain relevant. If we look at USA's Policy towards Asia Pacific it is called as Asia Pivot or Asia re-balance. India's Act East Policy also show the logic of Balance of Power.

② Deterrence :

What is deterrence?

Realist Approach to Peace.

Deterrence comes from the latin word 'de terrere' which means to frighten.

Deterrence is a policy to frighten potential adversary so that he does not attack. It is a psychological concept based on game theory. It is assumed that actors are rational. It depends on convincing the adversary -

(i) No chances of winning.

(ii) In case adversary wins then the cost of the victory is not worth paying.

Deterrence automatically leads to arms race. Deterrence is a very old concept. In recent times, Nuclear deterrence has assumed new relevance.

→ Types of deterrence?

(1) Conventional & Nuclear.

(ii) Deterrence by denial & deterrence by punishment.

Deterrence by punishment require country to develope 2nd strike capacity.

(iii) Direct & Extended Deterrence.

(iv) Massive retaliation Vs Flexible response.

Massive retaliations - Targetting civiliations to inflict unacceptable damage. It will require developement of strategic weapons.

- Deterrence by denial - if only one country has nuclear weapon fighting with eads other.
- Massive retaliation - concept by Eisenhower (us president).
- India policy - Massive Retaliation.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

flexible Response was the concept of kennedy Administration. He suggest development of technical weapons (short range).

→ Relevance of Deterrence in 21st century.

(i) Nuclear deterrence was the defining aspect of US ; Russia relations throughout cold war. It was suggested that once cold war is over countries should leave reliance on nuclear deterrence in their security policy. However, in post cold war situation also 9/11 major countries continued to rely on Deterrence. Even at present time Nuclear deterrence is most defining aspect of US- Russia relations. After the end of cold war the no. of countries possessing nuclear weapons has actually increased in number. Eg. India, Pakistan, North Korea. Iran has been accused of acquiring Nuclear Weapons. Actually new arms race has started If we look at security doctrines of dominant countries none of the country is ending the reliance on deterren

(i) In 1995 US strategic Command has brought the document Essentials of Post Cold war deterrence. the document show that US will continue to rely on nuclear deterrence.

(ii) 2002 National Security Strategy of USA mentions that it will develop sophisticated delivery system & will keep old hardware operation.

(iii) Bush Doctrine- US took preventive war against Iraq to stop rogue nations acquiring weapons of mass destruction.

Rogue Nation- nussance of neighbour & who try to acquire weapons of mass destructions.

-Pakistan - nuclear weapons - financed by Saudi Arabia.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

(iv) Nuclear Posture Review Report, 2010 of USA
USA will strengthen strategic deterrence & regional deterrence

(v) Deterrence & Defence Posture Review of NATO, 2012.
Nuclear weapons are going to be core components of NATO's overall deterrence.

(vi) National Security Strategy of Russia, 2016
Rely on deterrence.

(vii) France has revived its nuclear doctrine & clarified that it will use Nuclear weapons in case of terrorist attacks.

Conclusion.

None of the major power has reduced reliance on Nuclear Deterrence

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

③ Collective Security -

→ What is collective security ?
→ Difference b/w collective security & Balance of Power.
→ collective security & UN Peace keeping.

Q. Examine the working of collective security under UN.

It is a Liberal view to establish peace.
First proposed by Woodrow Wilson.
What is the idea of collective security ?
All for one and one for all.
It means it is an alternative to the Realist view. According to which security is the concern only of the state. Collective security is based on the concept of Balance of power only. Both collective security & Balance of Power share following assumptions :

(i) War is a regular feature of International Politics.
(ii) Greater Power is Anti-dote to power.

What is the difference b/w collective security and Balance of Power ?

Collective security is institutionalise form of Balance of Power. Balance of Power is Ad hoc based on common sense whereas collective security is an institutionalise mechanism. It can come into existence only when International organisation exists.

Why it is a better concept over BOP according to liberals
If Balance of Power is a nervous state of peace. collective security is more assured state of peace.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

What is the limitation of collective security?

It is a utopian concept. It could not be enforced in practice. It is based on wrong assumptions as if nations are concerned about peace. If states are guided by National Interest rather than peace, it would be foolished thing that Nations will forget their long term interest for the sake of peace.

Experience with the working of collective security?

(i) First experiement was under League of Nations. Since league of Nations was the 1st experiement there were conceptual flaws in the way collective security was concieved under League of Nations.

(a) under league of Nations all countries have veto power. any action could be done only with the consent of all states which was impractical.

(b) charter had no clarity w.r.t the determination of the act of agression or agressior.

(c) USA. USSR were out of League.

(d) Britain & France considered USSR as a bigger enemy than Fascist Powers.

(e) league took no action when approached to the league of Nation against Japan's invasion in Manchuria in 1931.

(f) League took no action when Ithopia approached against Italy's Invasion in 1936.

Experience under United Nations.

(i) some procedural improvements have been done w.r.t the act of agression.

(ii) Now the concent of only P-5 is required.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Collective Security in Practice -

(i) Collective security was one of the main objective of UN But it remained paralysed because of East-West conflict.

(ii) During cold war the only example of collective security is Korean crisis of June 1950.

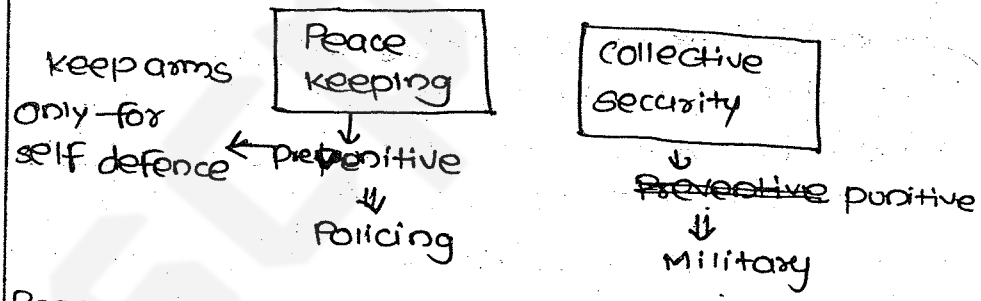

(iii) However USSR vetoed the collective security operation in case of Korea which stopped the action.

→ Uniting for peace resolution. or Acheson plan.

If security council is in deadlock 2/3rd of the members of General Assembly can authorise collective security action. However, USSR never accepted the legality of Uniting for Peace resolution. Later on it became even more difficult to operationalise collective security even through uniting for peace resolution.

→ UN Peace Keeping.

Peace keeping is not a part of UN charter. It was a brain child of the then UN security General Dag Hammerskjold.

Peacekeeping itself show the failure of collective security.

→ Dag Hammarskjold awarded for peace keeping - India have seen.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Collective security after Cold War:

(i) Gulf War, 1989 -

Significance - So far the best example. More than 30 countries participated under the leadership of USA. USSR did not used veto despite Iraq had close relations with USSR. It was thought that now collective security will be able to work.

Present status:

P2 → China, Russia
P3 → Britain, France, USA

Very soon conflicts b/w US & Russia re-appeared. UNSC again went into deadlock. Presently, UNSC remains polarised b/w P2 & P3. In post cold war situation a new concept has come up known as Responsibility to Protect because collective security was meant for inter state conflict whereas present conflicts are intra-state.

In present times even peace keeping is becoming a challenging task.

Why?

Because conflicts are intra-state, non-state actors are not as responsible, there have been instances where Peace keepers have been attacked.

Current debate in UN Peace keeping:

(i) Peace Keeping is becoming more dangerous. Developed countries proposed "resolute peace keeping" it means well equipped peace keepers.

(ii) Developed countries do not send their troops.

(iii) Developing countries are true contributors.

(iv) Developed countries contribute fund. From developed countries point of view:

- There is a mis-appropriation of funds by developing countries
- Poor quality of services.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Developing countries point of view :-
Developing countries have reservations because security council does not go for consultation with true contributing countries.

→ India and UN Peace keeping
Source - MEA → India & UN section (factual Informa?)
- major peacekeeping operations where India participated
- Year in which India got best peace keeping award.
- How many Indian Soldiers sacrificed their lives.
- Training centre for UN peacekeeping.
- Indian Peace keepers - one of the best - professionally.
- their ability to communicate to local people.
- India has been actively involved in determining the side of Peace keeping.

Why India goes for Peace keeping?
India's participation in peace keeping is the strongest arguement for India's permanent seat in UNSC.

What is the approach of Present Govt.
There is a lack of enthusiasm for peace keeping.
Why? → lack of recognition of India's contribution.
many scholars suggest India to adopt non-cooperation with UN to make UN realise the importance of India's contribution.

collective security & collective deponce.

Eg. NATO

There is a difference of Point of view b/w India & USA over collective defence.

India's Point of view.

India opposes collective defence pacts like NATO According to India collective defence pacts undermine collective security. It show that country has no faith in UN system.

USA's Point of view.

(i) No contradiction.

(ii) UN charter recognise the right of countries for self defence (Art 51.)

(iii) According to USA collective defence is a practical way for operationalisation of collective security.

collective Defence is only for member countries.

whereas collective security is universal concept.

Imp:: 0. Security

Q. Discuss different perspectives on security. What should be the approach for security in 21st century?

Significance of security:
The most important Human value.
Most important security concern is security of life.
Traditionally most important concern of International Politics.

→ Security Theories -
① Security of what?
② Security from what?
③ Security through what?

→ Types of Theories
① Instrumental Theory
② Reflectivist Theory or Post Positivist Theory.

---

① Instrumental Theory.
ⓐ Realist Theory
Territorial integrity, Military Means & security from other states.
ⓑ Liberal Theory.
Security of the state.
Method - Functionalism, collective security, security community
ⓒ Marxist Theory.
Human security, Economic security.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

(2) Reflectivist Theory (all human security).

(i) Feminist theory

Importance of Human Security.

According to Cynthia Enloe, no where else states perspective is so gendered as in context of National security.

(ii) Social Constructivists Theory.

Security Dilemma is a product of our thinking. It is a product of our culture & History. Social constructivists suggest community, dialogue, building new culture.

(iii) Emancipatory vision.

Scholar - Andrew Linklater

(iv) Post Modernist & Post Structuralist:

Copenhagen school.

According to them, security is speech act.

Speech act means how politicians present an issue. Politicians securitise some issue & de-securitise others. Issues which are securitised start getting greater attention. Eg. In India, more no. of people die every year by simple diseases like diarrhea. But it appears as a terrorism or Pakistan is a major security issue.

According to Copenhagen School scholar, Bary Buzan, security concept in 21st century has to be comprehensive. We have to take an integrated view of Human security, National security & Global Security. The five pillars of security are:

(i) Military
(ii) Ecological
(iii) Political
(iv) Social
(v) Economic.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

⑤ National Interest :

Q. Do you think that the theory of National Interest is a Psudo Theory?

Introduction :

National Interest has been the main motivation of foreign policies. It means National Interest is a main concern of International Politics.

According to Morgenthau, the most important objective is National Interest & most reliable means is power. According to Morgenthau, Every country has some core, vital or fundamental Interest.

National Interest is a very subjective concept & there is no fixed order. It is difficult to determine what will constitute a National Interest for which country Eg. According to USA, Peace in Asia Pacific (south china Sea) is its core National Interest (Hillary Clinton).

According to Carter Doctrine, stability in Persian Gulf is USA's core National Interest.

one of the earliest analysis of the concept of National Interest was by Charles Beards in 1930.

In the words of Charles Beards 'If citizen have to support the govt. which prosecutes them soldiers have to die for it, foreign policies have to conform to it, what could be more appropriate term than National Interest.

National Interest becomes the basis for the justifications of actions by those who are in power. It is

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

difficult to determine as if there are some objectives National Interest.

Mohammad Yunus, Pakistani scholar, in his book 'Theory of National Interest' published in 2003. has shown how Army in Pakistan makes its interests as a national interest.

→ National Interest as a Psudo Theory.

Raymond Aron, called National Interest as a Peudo theory.

Why? It is an vague & ambiguous concept & it is not possible to ~~formulate~~ universally acceptable definition of National Interest.

Joseph Frankel - any such theory of National Interest is useless. Because it can be defined in many ways & for variety of purposes.

Burchill Scott - suggest that despite its wide use in political circles as a legitimation tool, National Interest as a concept is devoid of any substantive meaning.

What are the types of National Interest & what means state employ for promotion of NI?

Robinson has given following classification.

(i) Primary
(ii) Secondary
(iii) Permanent
(iv) Variable
(v) General
(vi) specific.

Means—

(i) Diplomacy
(ii) Propaganda.
(iii) Economic Growth.
(iv) Military Means.
(v) International Organisations.
(vi) International law
(vii) Treaties
(viii) Ideologies

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

⑥ Role of Transnational Actors.

→ Types of Actors in International Politics -

(i) State Actors - Eg. India, China, Russia. etc.

(ii) International Actors - UN

(iii) Transnational Actors - Terrorist Groups, MNCs, NGC
↳ Involving or operating in several nations.

Is there any role of Transnational Actors in International Politics?

① Realist Perspective.

Realist do not give significance at the most consider them as proxies.

② Liberal Perspective.

Liberals are the advocates of Non-State actors, like MNCs & NGOs. They consider these institutions as the source of developement & stabilisation.

③ Marxist Perspective

They recognise the role of MNCs & but they are critical of the role.

Since when non-state actors are playing role.

① Realist - No role.

② Liberals - After 1st world wars.

③ Marxist. Realist & Liberals both are misguiding because they are playing role since the beginning of I Politics. Eg. with East India co. came christian missionaries came as a soft power of British Empire

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

→ Present Status :-

There is a significant increase in the role of Transnational Actors.

Why?

Joseph Nye through his 3 dimensional chess Board Model show the diffusion of social power. Globalisation, IT Revolution & Rise of Human Rights consciousness has increased the role.

→ Role of MNCs

Role of MNCs has been a cause of concern b/w Developed & Developing countries.

Earlier developed countries had monopoly over MNCs & developing countries considered them as the means of Neo-colonialism.

In 1970s NAM countries have raised the issue of exploitation by MNCs at the platform of UN General assembly when they called for 'New Economic Int-ernational order',

MNCs have not limited their role in economic sph-ere they have been involved in political sphere also.

Sometimes MNCs use their govts ~~for~~ ~~fulfillment~~ of their commercial interests & at times govt use MNCs for fulfillment of Geopolitical interest.

Nature of MNCs are changing and at present MNCs of developing countries specially China, India, Venez-uela have started giving challenge to domination of western world.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Lecture 13
15/04/2017

→ Role of NGOs

As old as MNCs. Still there is a dominance of NGOs of western countries.

Art. 71 of UN charter recognise the role of NGOs as consultative bodies

Transnational NGOs like Amnisty NGO, Redcross have presence in more than 130 countries. these role have been recognised in International Peace as they have been Awarded Nobel Peace Award

MNCs NGOs & Govt of western countries work in close co-operation. China, Russia & at time India has accused Western NGOs working against the interest of these countries. Interference in Domestic Political Affairs. MNCs channalise their funds through NGOs rather than Govts of developing countries.

→ Role of Terrorists -

Role of terrorist organisations is also very old. Insurgents have been used by the state in Europe to destabalise empire. Communist govt. have also used left wing guerilla's for expansion of communism. After 2nd World War politics of terrorism started in West Asia since the creation of Israel. Once Arab Nations failed to defeat Israel in open war they started using non-state actors Eg. PLO - (Palestenian Liberation Org.)(earlier) for proxy wars. USA has been termed by Noam Chomsky as the first terrorist state in the world. USA has used Non-state actors to destabalise communist govt. in Afghanistan. Proxy war was adopted by USA against USSR. Almost all major powers have used non state actors as a means of foreign policy. Realist scholars consider them as proxies

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

& that is why until & unless Interstate conflict end, use of terrorism will not end. there is a trans-national terrorism in 21st century. It seems that terrorist actors are becoming like Frankstein monster. getting out of control of the states creating them.
Since 2001 USA is conducting Global War on Terrorism (GWOT) in recent years nuclear terrorism has become a cause of concern which has led US got to take new initiative such as Nuclear Security Summit.

→ Assignment - Nuclear Security Summit.
History, MEA (last summit 2016 - India's position).

upscpdf.com

Cold War

Q. Define the features of Cold War. Do you think cold war was inevitable or it was the story of mis. understandings & miscalculations.

Q. Do you think cold war has ended. Give arguements in support of your point of view.

Q. Causes of end of cold war in general & collapse of USSR in particular.

→ Introduction:

The term cold war was coined by Bernard Baruch to explain the state of relations b/w USA & USSR after 2nd World War. It was popularised with the publication of Walter Lippman's Book titled 'Cold War' Winston churchill's Fulton's speech in 1948 confirmed the existence of cold war. churchill held that from Stettin in Baltic to Trieste Adriatic has descended Iron Curtain speech. In 1961 Berlin Wall which devided east & west germany became the concrete manifestation of cold war known as East West conflict.

→ Defining Cold War:

Cold war denote all war like situation but it did not result into direct hot war because of Nuclear Weapons It was believed that had nuclear weapon not present world would have seen the third world war. Nuclear deterrence was the defining feature of cold war.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Cold War was not entirely cold it had its warm and cool phases. one of the worst sufferer of cold war was Third World.

→ Phases of cold War-

① From 1949 to 1969
② From 1969 to 1979 (Detente phase)
③ From 1979 to 1989

- 1989 - fall of Berlin Wall.
- Malta Summit b/w USA & USSR - In Malta Summit the two countries declared the formal end of cold war. the then US president H.W. Bush declared the beginning of Neo World order.

→ Was cold War Inevitable?

① Determinists Perspective
It was inevitable because of fundamental conflicts b/w the National Interest of the two super powers.

② Social constructivists Perspective
It was not inevitable but it was the result of misunderstandings, mis-calculations. cold war is a tail of missed opportunities.

→ Who was responsible for cold War

① Traditionalists Perspective. - USSR
② Revisionist Perspective - USA
③ Post-Revisionist perspective - Both

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Whether cold War was driven by ideological factors or for geopolitical factors?

Primarily geopolitical but ideology was used in a big way.

→ Beginning of cold Wars -

Actually there is no beginning & no end. still we can trace the origin to Bolshevik Revolution in Russia.

Timeline-

① Bolshevik Revolution in Russia in 1917.

USA supported Reactionary forces.

② Lenin's Foreign Policy

Lenin was of the view that communism is not secured if surrounded by capitalist countries. In 1919 he formed communist International for expansion of communism.

③ Stalin's Foreign Policy.

Stalin was more concerned about security of Russia in order to avoid confrontation with the west Stalin adopted policy of socialism in one country indicating no plan for expansion. However west did not trust Stalin. west continued to intervene in domestic affairs. ultimately stalin also started plan for expansion. he formed new body comintern. stalin's policy in the neighbourhood is known as Salami Tactics. which means cut the opposition one by one. stalin wanted to avoid involvement in political developement in west europe. He entered into non-agression pact with Hitler in 1939 known as Molotov Ribbentrop. Stalin also signed neutrality pact with Japan in 1941.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

USSR was forced to intervene in 2nd World War. Because Hitler started agression against USSR (the largest military campaign of Hitler during 2nd world war (operation Barbarrosa).

→ Developements during 2nd world war leading to the deterioration of relations:

(1) Delay on the part of western power to open 2nd front against Germany.

(2) Manhattan project - USA informed UK & Canada about Nuclear Project but kept it secret from Russia.

(3) Differences over future of Europe in general & Germany in particular. wartime conferences like Tehran & Yalta show the difference.

(4) Decision of USA to use Nuclear Weapon on Japan.
USA didn't want soviet presence in Japan.
USA aimed to warn USSR as it can also meet same fate if it remains adament.

(5) USA presented Baruch plan 1946 to UN.
significance - 1st effort for Nuclear Disarmament.
Proposal - All countries will surrender their Nuclear Materials & will take pledge not to develope Nuclear Weapon. A commission will be established under us. Once USA is assured it will surrender its weapons.

(6) Gromyko Plan.
Russia said 1st USA should surrender. Disarmament efforts failed. Nuclear arms race started. In 1949 USSR tested its 1st Nuclear Weapon. Thus emerged strategic bipolarity. The two superpowers started Nuclear arms race.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

the most defining feature of cold war.

Major events of the 1st phase of cold war.

① In Europe.

Berlin Blockade* in 1949

Significance- 1st & last direct confrontation bw superpowers in Europe. Display of US power & definite victory of USA. After Berlin Blokate USA established NATO in 1949 to assure its allies. USSR establishe Warsaw pact in 1955 after west Germany was included in NATO. Thus, Europe got devided into two military blocks. In 1961 Berlin wall was constructed.

② Cold War in Asia:

(i) 1949 victory of communism in china
US supported kuomintang party took refugee in Taiwan.

(ii) Korean crisis (1950-53)

Technically north & south korea are still involved. one of the most dangerous legacies of cold war.

Significance- USA had to intervene militarily. Partial success in rolling back communism. Even at present US aim is to end communism in North Korea.

(iii) Vietnam (1955-75)

Significance - USA was not successful in rolling back despite huge military involvement. USA even used chemical weapons. ~~bw~~ vietnam war led to the beginning of decline of US Hegemony.

→ Why USA didn't used nuclear weapon?

According to Nina Tannenwald (social constructivist scholar) USA could not dare to use nuclear weapon, they show the role of public opinion. Taboo has developed against

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

Nuclear weapons & it could be very difficult for any country to use Nuclear weapons. This shows values, norms, public opinion does matter.

Vietnam war led to the breakdown of Bretton woods systems. And it has led to the emergence of G7

③ Developements in Middle East -

① 1948 - creation of Israel -

② 1954 - Suez Canal crisis.

Significance - It marks the end of Pax Britannica.

Pax → dictated peace

What is Pax Britannica?

Suez crisis established that Britain is no more a power & decisions are going to be dictated b/w USA & USSR.

④ Cold War in Latin America.

① In 1948 USA established organisation of American states to check the expansion of communism but it failed to check the expansion in its own backyard.

② Major crisis - Cuban Missile crisis.

Significance - 2nd example where superpowers came in direct confrontation & it was necessary to go for cooling the situation. After cuban crisis Detente was started.

→ Doctrines During Cold War.

① Containment.

It was USA's foreign policy towards Russia during cold war. Chief architect of containment was realist scholar George Kennan. George Kennan was US ambassador to Russia. He has sent the famous 'long telegram'

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

with the name 'Mr. X'. In the telegram' he has communicated that there is a deep hostility in Russia towards USA. Russia look at USA in the state of permanent war there is a need of vigilant & patient containment.

② True man Doctrine- March 1947

Context- to save Turkey & Greece falling to communism US president demanded 400mn US Dollars from congress as emergency assistance.

Nature of the policy-

It was acceptance of containment. True man declared US commitment to assist people fighting for freedom in India.

True man doctrine marks the end of US isolation.

③ Marshall plan- June 1947

It is also known as European Recovery plan for reconstruction & developement of Europe. It was assumed that poverty will attract people to support communism. Support was even meant for east european countries.

④ Molotov plan / council for Mutual Economic Assistance/ COMECON.

CMEA was based on socialist concept it was the application of centralised planning in eastern europe. However it never worked remained defunct.

⑤ Domino Theory.

Pronounced during Higen Hower Administration gave justification for US involvement in Vietnam. If communism is not contained actively all countries will fall to communism.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

⑥ Military Pacts.

① 1954 - South East Asia Treaty Organisation or Manila Pact.
Member countries - USA, UK, France, Australia, New Zealand, Phillipines, Thailand, Pakistan.

② Central Treaty Organisation (1955) or Middle East Defence org. / Bag dad pact
Member countries — USA, Britain, Iraq, Iran, Turkey, Pakistan

- PHASE II — Detente Phase -

Detente meant relaxation of tensions. It does not mean qualitative change in the relations. It was also started b/w USA & China (Nixon - Kissinger Diplomacy). It is known as Rapproachment.

ost ↓ east. Ost Politik was started by west Germany towards east.

→ Important Events.

① 1964 - PTBT (Partial Test Ban Treaty).
② 1969 - NPT
③ ABM Treaty - 1972 (Anti-Ballestic Missiles Treaty).
In 2002 USA came out of ABM treaty citing the threat of Iran & Korea.
④ Strategic Arms Limitation Treaty I - 1972
⑤ Helsinki Accords - 1975
Significance - USA & Russia agreed that they will not make any attempt to change the territorial status Quo in Europe.
- west recognised the legitimate sphere of influence of Russia in Eastern Europe.
- Russia had recognised Human Rights.

End of Detente - 1979.
Soviet invasion in Afghanistan. End of Detente & US announced the launch of star war. (strategic Defence Initiative).

→ Indications of the end of Cold War-

① Gulf War 1989
- For the 1st time USSR did not opposed US lead military operation under the platform of UN
- For the 1st time Govt of India allowed US plains facility for refuelling for the plains meant for war against Iran despite the fact that Iraq was NAM country & India had close relations.
- Dismantling of Berlin Wall - 1989
- Malta summit blw USA & USSR - 1989

→ formal pronancement of the end of cold war.
In 1991, Belabezha Accord by which USSR which was formed in 1922 was disintegrated. Art. 72 of soviet constitution gave right to secede from the confideration. It led to the establishment of CIS. (Common wealth of Independent states.) In 1990 CFE (Treaty on Conventional Forces in Europe) treaty (In 2007 Russia came out of the treaty.
- In 1991 START I (strategic Arms Reduction Treaty
- In 1993 START II was proposed but did not come into existence.

1991- Co-operative Threat Reduction Treaty or (Nunn - Lugar Pact)

Note - Russia has come out of it in recent times, not working with USA.

- Causes of end of Cold War.

there are 2 interpretations.

1. Cold War Ended (Malta Summit Declaration).
2. USA has won the cold war & Russia was looser.

Why communism collapsed?

Collapse of communism started with Poland. Solidarity came to power. communism collapsed one by one in all countries of Eastern Europe.

Why?

(i) Communism was not the choice of the people.
(ii) Communism was inforced on them.
(iii) Communists govt. were totalitarian regimes.
(iv) Demonstration effect as quality of life has improved considerably in western Europe.
(v) Communists policies resulted into shortages of even basic commodities.

→ Who is responsible?

1. Gorbachev Factor.
2. Reagen's Policies. (US President)
3. Multiple Factors

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

(i) Role of Gorbacher.

Gorbacher's Role is even recognised in the sense that he was declared the Man of Year by Times Magazine, later on the Man of the decade, He was also given Nobel Peace Price. When Gorbacher became President of USSR Soviet Economy was in a extremely bad situation.

→ Objective of Gorbacher.

His objective was to reform soviet union he didn't want the collapse of USSR.

→ Gorbacher Reforms.

(i) Foreign Policy Reforms.

Sinatra Doctrine Vs Brezhnev Doctrine.

→ Brezhnev Doctrine — (East Europe)

It was to maintain strong control over east european regime. However, it became unsustainable.

Sinatra singer ↓ song-my way

→ Sinatra Doctrine.

It is based on the famous song of Frank Sinatra, My Way. Gorbacher relaxed control. Once control was removed communism started collapsing.

(ii) Domestic Policy Reforms.

→ Perestroika means Economics restructure or Liberalisation

→ Glasnost means openess or Democracy (Freedom Press, Freedom of speech).

→ Views of Alex de Toqueville.

Most dangerous periods for tyrannies are not when they are at their worst but when they try to reform themselves.

3 Baltic states became first to come out of soviet union.

→ other factors which accelerated the collapse -

(i) Depression in Oil Prices.

(ii) Massive earthquake in USSR.

(iii) Chernobyl Nuclear Disaster.

the way Govt. had handled these tragedies resulted into resentment, freedom of Press has brought Global Criticism. challeged the legitimacy.

(iv) Reagens Policy towards Russia -

Reagen used to call USSR as evil empire.

Reagen administration followed the policy of 'Begger Die Enemy'.

Russia is known as weak Great power.

Russian economy had always been in crisis.

USSR targeted at its core weakness. USSR needed time to recover. USA first forced USSR to remain engaged in a costly war in Afghanistan.

- Reagen administration started star war. (Strategic Defense Initiative). Ultimately USSR collapsed.

Conclusion:

Events of such dimension cannot be attributed to the single cause.

USA - Russia relations after the end of cold war. Initially there were some signs that there will be qualitative change in the relation. Eg. US President H.W. Bush called for New World Order. treated Russia with respect. the then Russian President Yelstin adopted pro-west policies. the two set countries entered into arms control agreement. Yelstin was so much under US influence that he has cancelled the contract of transfer of cryogenic engine & technology to India.

US companies started looting the natural wealth. condition of Russia became worst. USA could not full-fill many other promises stabilising Russia. Relations started deteriorating during the time of Yelstin itself.

→ Fundamentals of US foreign policy -

USA → Manifest Destiny

↓

Expand the territories of liberty.

↓

World under USA.

In 1844 John O. Sullivan, Journalist of New York has coined the phrase 'Manifest Destiny'. It has become the major source of inspiration for US foreign policy makers. According to the concept, God has choosen USA for expansion of the territory of the liberty. It is a demonstrated fact as USA has been continuously expanding so far. USA has not lost any war & it is held that whatever war they have seems to have lost because they didn't want to win.

Former US secretary of state Madeline Albright called USA 'Indispensable Nation'.

The basic objectives of US foreign policy are:

(i) Protection of mainland & its people.

(ii) control the world trade.

(iii) control the oceans. - famous US geopolitical scientist Alfred T. Mahan held that the country which control the oceans will control the world.

What strategies USA has adopted?

(i) To check the rise of any power which can challenge US hegemony.
How? By keeping these powers contained in their own region.
How? By supporting weaker partner in the neighbourhood.

(iii) Create disturbances around neighbourhood.

(ii) To check Nuclear proliferation.
Do not let any new country acquire Nuclear Weapon.

What are US policies in different regions since September 11, 2001.
Since 2001 challenge to US Hegemony has come from new factor. Islamic Fundamentalism.
What is USA's policy towards Islamic World - though officially they have declared Global war on terrorism but practically their objective is -

- to prevent attacks in USA.
- US continuous to use terrorists groups as a means of its foreign policy.
- As far as middle east is concerned US policy is to keep it decided not let Islamic force emerge as an integrated threat.

→ Rising China.

Asia Pivot & Asia Rebalance.

In Asia Pivot, USA treats India as swing state.

→ Russia -

Russia has always been biggest Geopolitical threat to US,

Why?

(i) Russia is the only country in the world with Natural Resources at par with USA.

(ii) Russia also have technological advancement in Area of Space and defence at par with USA.

(iii) Russia is the biggest physical threat, as major USA biggest cities are within the range of ICPs

(iv) It is believed that if Russia wants it can destroy USA in 3 minutes.

(v) Russia is permanent member of UNSC which can challenge fall of USA's diplomatic moves.

(vi) US official establishment continues to view Russia as a biggest threat. the Basic framework of USA's Russia policy remained -

- maintain nuclear deterrence.
- consolidate the gains of collapse of USSR.
- do not let Russia to recover economically.
- keep Russia engaged in its neighbourhood.

→ Russia's policy towards USA.

(i) Russia also looks at USA as the major security threat as Russia is also under Nuclear Threat from USA.

(ii) Russia also aims at maintaining strategic balance,

(iii) Both Russia & USA look at each other as strategic rivals, though they seem to have some tactical engagement in Iran, N. Korea, Syria.

(iv) Russia wants to build coalition of forces against USA. Russia seek closer relations with EU Specially Germany.

(v) Russia sought to develope Russia-China-India axis.

(vi) Russia is finding it extremely difficult because of economic interdependence of China, India & EU (Germany on USA).

(vii) Russia also wants USA to keep engaged in Middle east.

(viii) In order to prevent US led order, Russia supports Iran & Syria.

(ix) Present Russia is not USSR there is a big gap b/w USA & Russia.

→ Major developements of USA - Russia relations since the end of cold war.

(i) 1995 NATO Bombing in Bosnia. 1st Time NATO forces were used. It was to protect the Muslims from serbian forces. It could had negative consequences in Russia's own provinces initated by Islamic Militancy, Eg. in chechniya.

(ii) US has imposed shock therapy on Russia. It made economic situation coarse.

(iii) In 1999 Putin became PM. Putin declared that he will go-for Nationalisation of Russia's oil & Gas.

(iv) In response in 1999. NATO was expanded eastward to include Hungary, Poland & Czech Republic.

Join Telegram for More Update : - https://t.me/upsc_pdf

Russia's Position

(i) Russia is against expansion of NATO eastward. Russia considered it as a breach of trust from Russi point of view it agreed for integration of Germany Because of the assurance given by the west that NATO will not be expanded eastward.

(ii) NATO Bombing in Serbia for second time This was to support Kosovo's independence. This action of NATO has not authorised by UNSC.

(iii) In 2002 USA declared that it is coming out of ABM - Ballestic Missile Treaty by giving Iran reason of Iran & North Korea are developing missiles.

(iv) In 2003 war against Iraq. It is going to have negative implications for Russia. Because it will destaba. lise middle east.

(v) 2003-& 2004 years of colored Revolution in Russia's neighbourhood.

(vi) 2004 NATO was again expanded to include Baltic states

(vii) 2007 NATO summoit, decision to include Ukraine & Gorgea.

(viii) In 2007 - Russia declared that it is coming out of CFE treaty against NATO's expansion.

(ix) 2007 - unique security council where Putin has criticised the use of Hyper Power by USA.

(x) 2008 - Kosova has declared independence. west has recognised that immidiately.

(xi) 2008 - Russia intervened in Gorgea & seperated & liberated south Ossetia from Gorgea.

https://t.me/upsc_pdf https://upscpdf.com https://t.me/upsc_pdf

Join Telegram for More Update : - https://t.me/upsc_pdf

(xii) 2009 - Obama administration started Reset.

(xiii) 2010 - New START treaty which reduced the no. of deployed weapons.

(xiv) 2011 - Arab spring in Syria.

(xv) 2014 - Crimia was integrated in Russia.

→ Present status -

- Proxy war. In Syria & eastern Ukraine.
  Diplomatic divisions as Russia has used veto again & again in west led (US) resolutions on Syria.
- They are involved in cyber warfare.
- They are also engaged in Arms race.
- US is deploying missiles in Romania & Poland.

What scholars say?

Scholars like @Dimitry Trenin, of Carnegi foundation called present state of relations as cold war 2.0 However there are scholars who dismissed the use of ~~same~~ phrase - Because

- Russia is not USSR
- No ideological conflict
- Russia does not have any alternative view of world order like that of USSR though it talks about multilateralism.

Conclusion

- Old geopolitics is shaping the relations.

Officially, it has been described that relations have become cool under Trump administration.
